Introduction

This publication reports 1988 academic library statistics from a 1989 survey conducted as part of the Integrated Post-Secondary Education Data System (IPEDS). (IPEDS--an ongoing project of the U. S. Department of Education's National Center for Education Statistics--collects all sorts of data on institutions of higher education in the U.S.) In addition to those data, it also includes several "per student", "per 1,000 students", and other ratio measures which may help in comparing library resources (inputs) and services (outputs) from one institution of higher education to another.

These include:

- librarians and staff (in full-time equivalents) per 1,000 students,
- staff and materials expenditures as percentages of total operating expenditures,
- total operating expenditures per student,
- print volumes per student,
- general and reserve circulation per student,
- interlibrary lending as a percentage of borrowing and interlibrary loans borrowed per 1,000 circulation,
- library visits and reference questions, both per hour and per student,
- database searches and program attendance per student.

Following the statistical tables are institutional rankings on selected service (i.e., output) measures. For each measure, there are two sets of rankings: one for colleges and universities and another for community colleges. Notably, few--if any--institutions rank highly or lowly on all eight measures.

Following the rankings is a series of charts illustrating data on key resources (i.e., inputs) and services (e.g., outputs). Each chart combines raw data (e.g., total FTE librarians) with an associated ratio measure (e.g., FTE librarians per 1,000 students). Please note that libraries are listed in descending order by the raw data item scaled on the left side of the chart (e.g., total FTE librarians). The scale on the right side of the chart refers to the associated ratio measure (e.g., FTE librarians per 1,000 students).

This publication was produced by the Library Research Service of the State Library and Adult Education Office. On request, the Service also provides customized reports, analyses, and presentations which may include narrative, tables, and/or graphics.

Data available from the Service are not necessarily limited to other institutions of higher education in Colorado. (For example, by summer 1990, each academic library in Colorado will receive a customized report of library data for its peer institutions nationwide.)

The Service also conducts fast-response surveys and provides technical assistance for identifying available data and designing forms and surveys for local use. Simple requests for data are handled as quickly as possible (usually the same day), and more involved research projects are accepted for completion by a negotiated deadline. Beyond that, all requests are accepted on a "first come, first serve" basis.

INTRODUCTION

This is the fifth edition of Statistics and Input-Output Measures for Colorado Public Libraries. This volume contains:

- library-by-library responses to all items in the "Colorado Public Libraries Annual Report 1988",
- summary statistics for seven ranges of population served, and
- summary statistics for the state.

In addition to high, low, and average figures, this year's summary statistics include three new figures:

- the median, or middle case (50%), which is the figure above and below which half of the reported figures on a given statistic fall,
- the third quartile (75%), which is the figure below which three-quarters of the reported figures on a given statistic fall, and
- the first quartile (25%), which is the figure below which one-quarter of the reported figures on a given statistic fall.

These three figures should prove valuable for several reasons:

- they reduce the impact of extreme values in a group,
- they provide three alternatives to average figures as bases for comparison, and
- they provide a readily understandable yardstick against which to assess individual library figures.

Readers whose libraries fall at the high or low ends of one of the population served groups might wish to compare their libraries against the 75% or 25% figures rather than the median (50%) or average.

Readers may also find it interesting to see in which quartile their libraries fall on selected statistics.

In addition, readers who are planning or budgeting for their libraries may find the new figures useful in setting quantitative objectives for performance.

Other additions to this year's edition of Statistics and Input-Output Measures for Colorado Public Libraries include the street and mailing addresses of public libraries and their phone numbers. This information may update that found in the Directory of Colorado Libraries, 1988-89, but should at least serve as a guide to directory readers who do know the name of the community in which a given library is located. (The directory lists libraries by community name only.)

Volume II of this publication is literally coming off the drawing board. It will be an atlas of public libraries in Colorado. That volume will include maps of library districts, county libraries, local libraries which receive county funding, strictly locally funded libraries, and bookmobile services. There will also be a map for each of the eight public library roles described in the American Library Association's Planning and Role-Setting for Public Libraries. Each of these maps will indicate libraries which claim that role as either a primary or secondary one. That volume will be introduced at the 1989 Colorado Library Association Conference.

As always, readers interested in receiving customized reports of the figures reported in this publication need only ask for them. Also, be reminded that, in addition to the Colorado Public Library Database, there is a Colorado Public Library Community Profile Database which offers a wealth of up-to-date demographic and economic data.

If you have any questions, comments, or suggestions regarding this publication, please contact either of us. It is on the basis of such communications that changes in the publication are made from year to year.

PLANNING, BUDGETING, AND PUBLIC RELATIONS WITH INPUT-OUTPUT MEASURES FOR PUBLIC LIBRARIES

A CASE STUDY

This essay reports input-output measures for Our Town Public Library and all public libraries serving comparable populations. (Similar comparisons might be made to libraries with similar operating expenditures or those located in the same Regional Library Service System.) A comparison of these figures has some noteworthy implications for planning, budgeting, and public relations by Our Town Public Library.

At least two general conclusions may be drawn from these two sets of input-output measures:

> On most input-output measures, Our Town Public Library compares poorly with all public libraries serving comparable populations.
>
> Lower service outputs generally follow from lower resource inputs. (Or, as the maxim goes, "you get what you pay for.")

OUTPUT MEASURES, 1988

While Our Town Public Library had the same registration per capita as the average library serving its size service population (.60), its other outputs were substantially poorer than those for the average library that size:

Output Measures, 1988	Our Town Public Library	Libraries Serving Like Service Pop.
Library Attendance Per Capita	1.1	3.3
In-Library Use Per Capita	0.1	1.5
Reference Per Capita	.03	0.3
Circulation Per Capita	0.6	6.0
Turnover Rate	0.20	2.00
ILL Per 1,000 Circulation	41	14
Program Attendance Per 1,000 Served	60	160

During 1988, residents of Our Town Public Library made fewer visits to the library, used fewer materials in the library, circulated fewer materials, circulated a smaller percentage of the library's holdings, and attended fewer library programs.

In addition, more of the materials wanted by Our Town library users were borrowed from other libraries. Alone, a higher number of ILLs per 1,000 Circulation might be interpreted as an indicator that a library is doing a better job of resource sharing. In this case, however, correspondingly lower In-Library Use and Circulation Per Capita and Turnover Rate suggest that materials in the collection did not meet user needs.

INPUT MEASURES, 1988

To determine why Our Town residents receive so much less library service than residents of similarly sized communities, it may be useful to examine input measures for Our Town Public Library and its counterparts:

Input Measures, 1988	Our Town Public Library	Libraries Serving Like Service Pop.
FTE Staff Per 1,000 Served	0.25	0.50
Volumes Held Per Capita	3.0	3.0
Staff Expenditures Per Capita	$1.50	$5.50
Materials Expenditures Per Capita	$1.00	$2.00
Miscellaneous Expenditures Per Capita	$0.81	$2.81
Total Operating Expenditures Per Capita	$3.90	$9.30

Clearly, in 1988, Our Town Public Library was substantially more hard pressed for resources than its counterparts serving similarly sized populations. The size of Our Town library staff relative to that of comparable libraries appears to be quite inadequate. Our Town spent only about one-third as much on staff, so each of its staff served more than twice as many residents. Notably, there is no evidence that Our Town's lower use of materials is attributable to the size of its collection. The amount spent by Our Town on new materials, however, is significantly lower than the figure for comparable libraries. An even more obvious comparison is the fact that Our Town spent less than half as much on miscellaneous operating expenditures as its counterparts. This category may include any of the costs of maintaining and operating library facilities--including utilities, telephone and other telecommunications, furniture and equipment.

As large a discrepancy as this one may be explained in either of two ways. Miscellaneous operating expenditures may average higher for comparable libraries than Our Town, because of the number of branches involved. Our Town Public Library might have no branches, but libraries serving similarly sized populations might have an average of one branch (in addition to their main facilities). That, however, was not the case in this example. In fact, in-kind contributions from Our Town relieved the library from having to cover many of these costs in its budget. In-kind contributions toward miscellaneous operating expenses might include space for the library in the city hall and payment of utility and telephone/telecommunications bills by Our Town.

This in-kind factor explains a sizeable proportion of the discrepancy in Total Operating Expenditures Per Capita. In the case of Our Town, however, it does not explain lower staff and materials expenditures and the lower outputs of library service for which they appear to be responsible.

CONCLUSIONS

The findings for this case study indicate a library which lacks a plan for focusing its present and future resources on the mission and/or roles most appropriate for it to play in the community. This library should develop such a plan, using a process such as those described in PLA's Planning and Role Setting for Public Libraries (Chicago: ALA, 1987) or Timothy M. Nolan's Applied Strategic Planning in a Library Setting (San Diego: University Associates, 1987).

Depending on the mission and/or roles selected by the library, productive strategies suggested by these data might include:

* developing a library budget request which includes increases in per capita funding for staff and materials to at least the average for its service population range and which includes figures reflecting the value of Our Town's in-kind contributions toward the library's miscellaneous operating expenses.

* promoting registration of borrowers as well as circulating and in-library use of the collection through a more aggressive public relations campaign,
* providing reference services to direct users to library materials which they may not be finding on their own,

* writing and implementing a collection development plan which establishes clear guidelines for building a collection that is more useful to the population served, and

* designing and offering public programs on topics and at times identified as desirable by users in the needs assessment.

A NEXT STEP

Having read how an analysis of input-output measures might be useful to the anonymous "Our Town Public Library", take a few minutes to complete the following form by inserting the figures for each measure for your library and for a group of comparable libraries. Call the Library Research Program (303/866-6737) for a custom report of these measures for any group of libraries in the state with which you would like to compare your library. Custom, computer-generated reports from this and other databases useful to public libraries are always available on request and at no charge.

Otherwise, comparable libraries based on population served, operating expenditures, or Regional Library Service System can be identified by consulting the lists of responding libraries at the end of this publication. Responding libraries are listed by population served, operating expenditures, and Regional Library Service System.

NARRATIVE

DEFINITIONS AND USES FOR INPUT-OUTPUT MEASURES

INPUT MEASURES

This section defines six input measures and describes their possible uses.

FTE STAFF PER 1,000 SERVED

FTE Staff Per 1,000 Served relates the number of full-time equivalent (FTE) staff to the number of persons in the library's legal service area. It is the number of library staff in FTEs divided by the number of persons in that area.

Full-time equivalent (FTE) staff is the total number of hours per week worked by all staff divided by 40. In this context, full-time means 40 hours per week, regardless of how many hours per week the library is open.

FTE Staff Per 1,000 Served measures the library's level of staffing relative to its service population.

This input measure may be relevant whenever the adequacy of library staffing and staff funding are issues. It is particularly useful when the population or geographical area which the library is established to serve increases dramatically. When that happens, there should be a corresponding increase in staff just to offset the population increase.

VOLUMES HELD PER CAPITA

Volumes Held Per Capita relates the number of volumes or units in the library's collection to the number of persons it was established to serve. It is the number of print volumes as well as non-print units held by the library divided by its legal service area population.

This figure indicates the average number of volumes held for each person in the library's legal service area population.

This input measure may be relevant whenever the size of the library's collection is an issue. It is particularly useful when the population or geographical area which the library is established to serve changes dramatically. For example, in the latter case, there should be corresponding increases in Materials Expenditures as well as Volumes Held Per Capita just to maintain the existing ratio of holdings to persons served.

STAFF EXPENDITURES PER CAPITA

Staff Expenditures Per Capita relates the amount of library funds spent on staff to the number of persons the library was established to serve. It is the dollar amount paid in salaries, wages, and benefits divided by the library's legal service area population.

This figure indicates the average cost per person of staffing the library.

This input measure may be relevant whenever the adequacy of library staffing or staff performance are issues. The cost-effectiveness of library services may be demonstrated by relating Staff Expenditures Per Capita to output measures which indicate the amount of service received (such as, Circulation and Reference Transactions Per Capita, and Program Attendance Per 1,000 Served).

It is also important to review this measure whenever the population of the library's legal service area changes dramatically. For example, if that population increases dramatically, there should be a corresponding increase in Staff Expenditures Per Capita just to maintain the existing level of support.

MATERIALS EXPENDITURES PER CAPITA

Materials Expenditures Per Capita relates the amount of library funds spent on materials for the collection (including print items, such as books & periodicals, and non-print items, such as audio and video cassettes and films) to the number of persons the library was established to serve. It is the dollar amount spent on such materials divided by the library's legal service area population.

This figure indicates the average cost per person of purchasing (but not processing) newly acquired materials.

Materials Expenditures Per Capita may be relevant whenever the size or usefulness of the collection is an issue. When using this figure to address such issues, it may be useful to relate it to other input measures which indicate the quantity of materials available to users (i.e., Volumes Held Per Capita) and to output measures which indicate the usefulness of those materials (such as Circulation Per Capita, Turnover Rate, ILL Net Lending Rate, and ILLs Per 1,000 Circulation).

It is also important to review Materials Expenditures Per Capita whenever the population of the library's legal service area changes dramatically. For example, if the population to be served increases dramatically, there should be a corresponding increase in Materials Expenditures Per Capita just to maintain the existing level of support.

MISCELLANEOUS EXPENDITURES PER CAPITA

Miscellaneous Expenditures Per Capita relates the amount of library funds spent for purposes other than staff & materials costs) to the number of persons the library is established to serve. It may include the dollar amount spent on miscellaneous operating expenses (including utilities, telephone and telecommunications, and office supplies) divided by the library's legal service area population.

This figure approximates the average cost per person of running library facilities.

This input measure may be relevant whenever the economy or efficiency of the library's day-to-day operations is an issue. The cost-effectiveness of library operations may be demonstrated by relating Miscellaneous Expenditures Per Capita to those output measures which best reflect the range of most frequently used services & programs the library provides to its users.

It is also important to review this measure whenever the population of the library's legal service area changes dramatically. For example, if the population to be served increases dramatically, there should be a corresponding increase in Miscellaneous Expenditures Per Capita just to maintain the existing level of support.

OPERATING EXPENDITURES PER CAPITA

Operating Expenditures Per Capita relates the total amount of library funds spent for all purposes to the number of persons the library is established to serve. It includes the dollar amount spent on staff, materials, and miscellaneous expenses divided by the library's legal service area population.

This figure approximates the average cost per person of running the library.

Operating Expenditures Per Capita may be relevant whenever the economy or efficiency of the library's overall operation is an issue. The cost-effectiveness of library operations may be demonstrated by relating Operating Expenditures Per Capita to those output measures which best reflect the range of most frequently used services & programs the library provides to its users.

It is also important to review this measure whenever the population of the library's legal service area changes dramatically. For example, if the population to be served increases dramatically, there should be a corresponding increase in Operating Expenditures Per Capita just to maintain the existing level of support.

OUTPUT MEASURES

The nine output measures discussed here include seven of those covered by PLA's Output Measures for Public Libraries (second edition). After these measures are defined and their possible uses are described, public library roles with which they are most closely associated are identified. (See PLA's Planning and Role Setting for Public Libraries for detailed descriptions of these roles and a process for selecting and using them to plan for a public library.) The table on the following page summarizes these relationships between output measures and public library roles.

REGISTRATION PER CAPITA

Registration Per Capita relates the number of persons registered as borrowers to the number of persons the library is established to serve. It is the number of individual registrations divided by the library's legal service area population.

This measure indicates the percentage of the library's potential users who have at least demonstrated an intent to borrow materials from the collection.

NOTE: Although all registration figures reported by Colorado public libraries are included in this document, figures for libraries which have not updated their registration files in the past three years should be regarded as being of questionable validity.

This output measure may be relevant whenever public awareness of the library is called into question. Assuming a library's registration file is up-to-date, this figure indicates the percentage of potential users who--at the very least--know the library exists and have implied an intent to use it. High Registration Per Capita may also be useful in justifying increases in input measures (such as Staff, Materials, and/or Miscellaneous Expenditures Per Capita).

A library which plays the Popular Materials Center role will strive for a high score on this output measure.

PUBLIC LIBRARY ROLES AND OUTPUT MEASURES

Public Library Role	Output Measures
Community Activities Center	Library visits per capita Program attendance per 1,000 served
Community Information Center	Library visits per capita Reference per capita Program attendance per 1,000 served
Formal Education Support Center	In-library use per capita Reference per capita Turnover rate ILL net lending rate ILLs per 1,000 circulation
Independent Learning Center	In-library use per capita Turnover rate ILL net lending rate ILLs per 1,000 circulation
Popular Materials Library	Circulation per capita Turnover rate
Preschoolers Door to Learning	Library visits per capita Circulation per capita Turnover rate Program attendance per 1,000 served
Reference Library	Library visits per capita In-library use per capita Reference per capita
Research Center	In-library use per capita Reference per capita ILL net lending rate ILLs per 1,000 circulation

LIBRARY VISITS PER CAPITA

Library Visits Per Capita relates the number of visits made to the library to the number of persons the library is established to serve. It is attendance at the library during a typical week multiplied by 52 (the number of weeks in a year) divided by the library's legal service area population.

This measure may be estimated by counting the number of persons (excluding library staff, of course) who enter--or, if preferred, leave--the library during a typical week. A typical week is one during which the library is open its regular hours (no holidays) and which is neither extraordinarily busy nor slow.

Library Visits Per Capita indicates the average number of library visits per person served.

It is a better measure of public awareness of the library than Registration Per Capita. While registration statistics on which the latter is based may be out-of-date and, therefore, questionably valid, attendance statistics on which the former is based reflect actual visits to the library. Taken with In-Library Use, Reference, and Circulation Per Capita, and Program Attendance Per 1,000 Served, Library Visits Per Capita can be used to develop an annual profile of library use.

A library will strive for a high score on this measure if its roles include Community Activities or Information Center, Preschoolers' Door to Learning, or Reference Library.

IN-LIBRARY USE PER CAPITA

In-Library Use Per Capita relates the number of materials used in the library (but not checked out) to the number of persons the library is established to serve. It is in-library use per typical week multiplied by 52 (the number of weeks in a year) divided by the library's legal service area population.

In-library use per typical week may be determined by counting the number of items to be reshelved or refiled during a typical week (that is, one during which the library is open its regular hours--no holidays--& which is neither extraordinarily busy nor slow) or a week's worth of typical days (for example, Monday the first week, Tuesday the second week, and so on).

This measure indicates the average number of items used in the library (but not checked out) per resident of the library's legal service area.

This output measure may be relevant whenever evidence of library use is required. To the extent that people turn to the library as a source of useful information (rather than a repository of recreational reading), In-Library Use Per Capita is at least as important to consider as Circulation Per Capita.

A library will strive for a high score on this output measure if its roles include: Formal Education Support Center, Independent Learning Center, Reference Library, or Research Center.

REFERENCE PER CAPITA

Reference Per Capita relates the number of information contacts in which a staff member involves information sources to the number of persons the library is established to serve. It is the number of reference transactions per typical week multiplied by 52 divided by the library's legal service area population.

This measure indicates the average number of times a resident of the library's legal service area received staff assistance in using information sources available at or accessible through the library.

Reference Per Capita may be relevant whenever the impact of reference service is an issue. Comparing this figure to Circulation and In-Library Use Per Capita may be useful in assessing the reference desk as an access point for information available in the local collection. Comparing it to ILLs Per 1,000 Circulation and ILL Net Lending Rate may be useful in assessing access via the reference desk to information that may not be available locally.

A library will strive for a high score on this output measure if its roles include Community Information Center, Reference Library, or Research Center.

CIRCULATION PER CAPITA

Circulation Per Capita relates the number of loans of library materials to the number of persons the library is established to serve. It is the number of loans divided by the library's legal service area population.

This measure indicates the average number of loans made to each resident of the library's legal service area annually.

This output measure may be relevant whenever the size of the materials budget, the size of the collection, or its level of use is an issue. It may be useful to examine the relationship of this measure to selected input & output measures. For example, lower Circulation Per Capita is a likely result of lower Materials Expenditures & Volumes Held Per Capita. It is also likely to lead to more ILLs Per 1,000 Circulation.

A library which plays either the Popular Materials Center or Preschoolers' Door to Learning role will strive for a high score on this output measure.

TURNOVER RATE

Turnover Rate relates the number of loans of library materials to the size of the collection. It is the number of loans divided by the number of volumes held in the collection at the end of the year.

Turnover Rate indicates how often each item in the collection was loaned, assuming that circulation was evenly distributed among the library's holdings.

This measure may be relevant whenever use of the collection is an issue. In that case, it may be useful to compare this figure to selected inputs (i.e., Volumes Held Per Capita) and outputs (such as Circulation Per Capita and ILLs Per 1,000 Circulation).

A library will strive for a high score on this output measure if its roles include Formal Educational Support Center, Independent Learning Center, or Popular Materials Center.

ILL NET LENDING RATE

ILL Net Lending Rate relates the number of materials provided to other libraries through interlibrary loan to the number of materials borrowed from other libraries thorugh interlibrary loan. It is the number of items loaned divided by the number of items borrowed.

This measure indicates items loaned as a percentage of items borrowed.

This output measure may be relevant whenever the nature of the library's participation in interlibrary loan activities is an issue. It indicates whether the library does more lending (scoring over 1.0) or more borrowing (scoring less than 1.0). "Net Borrowers" may use this figure as evidence of what they gain from participating in such activities, while "net lenders" may use it to argue for the maintenance of strong collections.

A library will strive for a high ILL Net Lending Rate if its roles include Formal Education Support, Independent Learning, or Research Center.

ILLS PER 1,000 CIRCULATION

ILLs Per 1,000 Circulation relates the number of materials borrowed from other libraries to the number of materials from the local collection made available to borrowers. It is the number of ILL requests divided by total circulation multiplied by 1,000.

This measure indicates the number of interlibrary loans for every 1,000 items circulated from the local collection.
On the one hand, higher ILLs Per 1,000 Circulation might indicate better performance by the library as an access point for information not contained in the local collection. On the other, a lower figure might indicate that the local collection was doing a better job of meeting user needs. Which interpretation to make of this statistic would depend on which issue was at hand as well as the actual amount of ILL and circulation activity per capita. (Higher levels of ILL and circulation activity would favor the former interpretation, while lower levels of such activity would favor the latter interpretation.)

A library will strive for a high score on this output measure if its roles include Formal Education Support Center, Independent Learning Center, or Research Center.

PROGRAM ATTENDANCE PER 1,000 SERVED

Program Attendance Per 1,000 Served relates attendance of scheduled presentations which are sponsored by the library and deal with information services (on or off library premises) to the population the library is established to serve. It is program attendance divided by the library's legal service area population in thousands.

Program Attendance Per 1,000 Served indicates the number of residents per 1,000 in the library's legal service area who attended a library program during the year.

This output measure may be relevant whenever the library needs to demonstrate its services to groups (in contrast to traditional services to individuals, such as circulation and reference).

A library will strive for a high score on this output measure if its roles include Community Activities Center or Independent Learning Center.

RESPONDENT IDENTIFICATION

Library ______________________________

Street/Mailing Address ______________________________

City ______________ County ______________ Zip Code __________

Area Code (______) Telephone Number ______________________

Person Completing Report ______________________________

PART I -- GENERAL INFORMATION (see Instructions, p. 1)

1. Specify the legal service area of this library ______________
____

2. Has the library updated its registered borrower file at least once during the past three years? Circle YES or NO

REGISTERED BORROWERS		**NUMBER**
3.	Adult (including young adult, if applicable)	________
4.	Juvenile	________
5.	TOTAL INDIVIDUAL REGISTRATION (3 + 4)	________
6.	Family/Household registration	________
SERVICE OUTLETS		**NUMBER**
7.	How many service outlets does this library administer? (Include the only or central library as well as any branches or library district members that do not report separately.)	________
8.	Bookmobiles (number of vehicles, not stops)	________
9.	Other service outlets (deposit collections in nursing homes, hospitals, jails, etc.)	________

PART II -- PAID LIBRARY STAFF
(See Instructions, p. 2 and
Work Sheet, p. 3)

NUMBER OF FTE
(Full-Time Equivalents)

10. All librarians ____________

11. All other staff (except plant operation, security, & maintenance staff) ____________

12. TOTAL PAID LIBRARY STAFF (10 + 11) ____________

13. Librarians with ALA-accredited MLS degrees (included in 10) ____________

PART III -- LIBRARY INCOME
(See Instructions, pp. 2-4)

WHOLE DOLLARS ONLY

		City	County	District
14-16.	General fund	$__________	$__________	$__________
17-19.	Sales tax	__________	__________	__________
20-22.	Mill levy	__________	__________	__________

23. Mill levy rate (if applicable) __________

24. Other local income (specify source)
____ $__________

25. TOTAL LOCAL INCOME (Total 14 - 22, 24) $__________

26. State income (county equalization, payment for lending, Colorado Endowment for the Humanities, etc.) $__________

27. Federal income (Library Services & Construction Act (LSCA), National Endowment for the Humanities, etc.) $__________

28. Private foundation grants & corporate giving (El Pomar Foundation, Coors, etc.) $__________

29. Library-generated income (if retained by library) (photocopying, fines, book sales, fee-based services, reciprocal borrowing, etc.) $__________

30. Individual gifts and donations $__________

31. Other income--please specify source:
____ $__________

32. TOTAL LIBRARY INCOME (Total 25 - 31) $__________

33. Estimated value of in-kind resources (only if counted for county equalization eligibility) $__________

PART IV -- LIBRARY EXPENDITURES (See Instructions, pp. 4-5)

34. Salaries & wages (excluding plant operation, security, and maintenance staff) $__________

35. Employee benefits (excluding plant operation, security, and maintenance staff) $__________

36. TOTAL STAFF EXPENDITURES (34 + 35) $__________

37. Print materials (excluding periodical subscriptions, microforms) $__________
38. Periodical subscriptions (all formats) $__________
39. Microforms (excluding periodicals) $__________
40. Computer software (including CD-ROM) $__________
41. Videocassettes, videodisks $__________
42. Other materials (audio, film, etc.) $__________

43. TOTAL MATERIALS EXPENDITURES (Total 37 - 42) $__________

44. Preservation/conservation (binding, re-binding, acid-free boxes, etc.) $__________

45. Telephone, telecommunications costs $__________

46. Postage $__________

47. Other costs (utilities; plant operation, security, & maintenace salaries; furniture & equipment, supplies, etc.) $__________

48. TOTAL MISCELLANEOUS OPERATING EXPENDITURES (Total 44 - 47) $__________

49. TOTAL OPERATING EXPENDITURES (Total 36, 43, 48) $__________

50. Capital outlay (new building, renovation, etc.) $__________

PART V -- LIBRARY MATERIALS
(See Instructions, pp. 5-7)

VOLUMES OR PHYSICAL UNITS
HELD AT END OF 1988

51. Books, periodicals, and newspapers __________

52. Audio materials (records, cassettes, compact disks, etc.) __________

53. Films __________

54. Video materials (cassettes, disks, etc.) __________

55. Computer software packages (including CD-ROM) __________

56. Current periodical and newspaper subscriptions (including duplicate titles) __________

PART VI -- SERVICE PER TYPICAL WEEK
(See Instructions, pp. 6-7)

Public service hours per typical week NUMBER

57. --unduplicated (if reporting for a library with branches or all libraries in a library district, do not count overlapping hours) __________

58. --duplicated (if reporting for a library with branches or all libraries in a library district, do count overlapping hours) __________

59. Library visits per typical week __________
60. In-library use per typical week __________
61. Reference questions handled per typical week __________

PART VII -- ANNUAL SERVICE (See Instructions, pp. 7-8)

Circulation NUMBER

62. Adult __________
63. Juvenile __________

64. TOTAL CIRCULATION (63 + 64) __________

Group programs/presentations

65. Children's (story hour, summer reading, etc.) __________
66. Adult (including young adults, if applicable --"Let's Talk About It", literacy, etc.) __________

67. TOTAL GROUP PROGRAMS/PRESENTATIONS (65 + 66) __________

Group program/presentation attendance NUMBER

68. Children attending programs/presentations __________
69. Adults (including young adult, if applicable) attending programs/presentations __________

70. TOTAL GROUP PROGRAM/PRESENTATION ATTENDANCE (68 + 69) __________

Interlibrary loans

71. Provided to other libraries __________
72. Received from other libraries __________

PART VIII -- LIBRARY FACILITIES (See Instructions, p. 8)

73. Total square feet of library space __________

74. Square feet of office/work space (included in 73) __________

75. Seating capacity (excluding meeting rooms) __________

76. Number of meeting rooms __________

77. Seating capacity in all meeting rooms __________

PART IX -- LIBRARY ROLES (See Instructions, p. 9, and PLA's PLANNING & ROLE-SETTING FOR PUBLIC LIBRARIES, p. 28)

Indicate the three (3) **MAJOR** roles emphasized by the library, using "1" to indicate the primary role or roles and "2" for the secondary role or roles. (Use either "1" or "2" twice.) Leave BLANK the spaces following other roles. If library decision-makers have not participated in the PLA planning and role-setting process, the director's judgment regarding the library's roles should determine these responses.

78. Community activities center __________
79. Community information center __________
80. Formal education support center __________
81. Independent learning center __________
82. Popular materials library __________
83. Preschoolers door to learning __________
84. Reference library __________
85. Research center __________

PART X -- TAX FORMS (See Instructions, p. 9)

86. Does the library receive multiple copies of tax forms from the Internal Revenue Service? Circle YES or NO

INSTRUCTIONS

COLORADO PUBLIC LIBRARIES ANNUAL REPORT 1988

PART I -- GENERAL INFORMATION

1. SPECIFYING THE LEGAL SERVICE AREA. The library's legal service area is the geographical area (i.e., town, city, county, or school district) for which it has been established to offer services and from which (or on behalf of which) the library derives its primary income PLUS any areas served under contract.

The legal service area of a public library DOES NOT include the legal service area of another public library with which the reporting library has a reciprocal borrowing agreement. Only the jurisdiction for which the library is the SOLE or PRIMARY source of library service should be claimed.

An area is served under contract if the reporting library or its jursidiction has a written agreement with another library or jurisdiction to provide library services to all or a specified part of the population residing in the other jurisdiction. For instance, a city public library may have a written agreement with its county to provide library service to a percentage of the population living in unincorporated areas of the county. Presumably, there will be a written agreement between the governmental units involved in such cases.

EXAMPLES: Population of Coloradoville.
Population residing in Coloco school district.
Population of Coloradoville plus 10% of population in unincorporated areas of Coloco county.

3-5. ADULT, JUVENILE, & INDIVIDUAL REGISTRATION.
6. FAMILY/HOUSEHOLD REGISTRATION.

Items 3 & 4 ask for a breakdown of individual registration by adult (including young adult, if applicable) and juvenile. Item 5 asks for the sum of those two items or, if adult and juvenile figures are unavailable, individual registration alone.

Item 6 asks for family or household registrations, only where such registrations take the place of individual registration.

7-9. SERVICE OUTLETS. Item 7 asks for a count of the only or central library and any branches or library district members that do not report separately.

PART II -- LIBRARY STAFF

10-12. LIBRARIANS, OTHER STAFF, TOTAL PAID STAFF.

Item 10 asks for the number of paid "librarians" in full-time equivalents (FTEs), WHETHER OR NOT they have the Master of Library Science (MLS) degree accredited by the American Library Association.

See the work sheet on the following page for easy-to-follow directions for calculating FULL-TIME EQUIVALENTS.

Item 11 asks for all other paid staff in FTEs, excluding plant operation, security, and maintenance staff. Item 12 is the sum of those two figures.

13. LIBRARIANS WITH ALA-ACCREDITED MLS. Item 13 asks for a separate FTE count of librarians who have ALA-accredited MLS degrees. These FTEs should also have been counted in item 10.

PART III -- LIBRARY INCOME

14-22. LOCAL INCOME BY SOURCE (CITY, COUNTY, LIBRARY DISTRICT) & TYPE (GENERAL FUND, SALES TAX, MILL LEVY).

In recent years, the annual report has asked for amounts of local income by type, but sources of local income were only checked off. That has made it difficult or impossible to provide some data requested by libraries from the Library Research Program. So, beginning this year, local income amounts will be requested by both source and type. Please provide these figures in items 14-22.

23. MILL LEVY RATE. If a figure is entered for item 20, 21, or 22, enter here the mill levy rate on which that figure is based.

24. OTHER LOCAL INCOME. Item 24 asks for any other local income, excluding private foundation grants and corporate giving, library-generated income, and individual gifts and donations, all of which are requested in subsequent items.

25. TOTAL LOCAL INCOME. Item 25 asks for the total of items 14-22 and item 24.

26. STATE INCOME. Item 26 asks for the total of all income received by the library from state sources. This includes county equalization grants, payment-for-lending reimbursements, Colorado Endowment for the Humanities grants, etc. It excludes federal funds distributed by the state, such as Library Services and Construction (LSCA) Act grants, etc.

WORK SHEET FOR
CALCULATING FULL-TIME
EQUIVALENT (FTE) STAFF

Items 10-13 ask for staffing figures in FULL-TIME EQUIVALENTS --or FTEs. For FTE figures to be comparable across libraries, they must use the same base number of hours per week to define "full-time". For that reason, a 40 hour work week is assumed in these figures--even for libraries which are not open 40 hours per week. So, even though a staff member may work all of the hours the library is open, if that number of hours is less than 40, she or he should not be counted as 1.0 FTE for purposes of this report.

The following sample work sheet may be useful in determining the number of FTEs to report for each of items 10-13 for this library.

EXAMPLE

STAFF MEMBER	HOURS PER WEEK		
1. Jane Smith	20		
2. John Brown	20		
3. Nancy Jones	10		
4. Bill White	10		
TOTAL	60	/40 =	1.5

WORK SHEET

STAFF MEMBER	HOURS PER WEEK		
1.			
2.			
3.			
4.			
5.			
6.			
7.			
8.			
9.			
10.			
TOTAL (1-10)	_____	/40 =	_____

27. FEDERAL INCOME. Item 27 asks for the total of all income received by the library from federal sources. This includes grants from LSCA, National Endowment for the Humanities, etc.

28. PRIVATE FOUNDATION GRANTS & CORPORATE GIVING. Item 28 asks for the total of all income raised from private foundations, corporations, businesses, non-profit organizations, and other private groups. It excludes both in-kind support from private groups and cash gifts and donations from individuals.

29. LIBRARY-GENERATED INCOME (if retained by the library). Item 29 asks for the total of all income raised by the library through its own activities. Such activities include photocopying, fines, book sales, fee-based services, reciprocal borrowing, etc.

30. INDIVIDUAL GIFTS & DONATIONS. Item 30 asks for the total of all income received as cash gifts and donations from individuals. It excludes both funds received from private foundations, corporations, businesses, non-profit associations, and other groups and in-kind support from groups or individuals.

31. OTHER LIBRARY INCOME. Item 31 asks for the total of all income not reported in items 14-30.

32. TOTAL LIBRARY INCOME. Item 32 is the total of items 25-31.

33. IN-KIND RESOURCES. Item 33 asks for an estimate of the amount of tax dollars represented by resources provided on an in-kind basis, which the library wishes to be counted toward local maintenance of effort for county equalization eligibility.

PART IV -- LIBRARY EXPENDITURES

34-36. SALARIES & WAGES, EMPLOYEE BENEFITS, AND TOTAL STAFF EXPENDITURES.

Items 34 and 35 ask for expenditures on staff salaries & wages and employee benefits separately, while item 36 is the total of those two items. If separate figures for salaries & wages and employee benefits are not available, enter total staff expenditures for item 36.

37-43. MATERIALS EXPENDITURES (BY TYPE AND TOTAL)

Items 37-40 ask for expenditures on print materials, periodical subscriptions, microforms, and computer software.

Item 41 is a new item which asks for expenditures on video materials alone. (In recent years, expenditures on video materials have been combined with audio materials and films.) Separating out video expenditures will make it possible to begin tracking the impact on library budgets of this increasingly popular format.

Item 42, other materials expenditures, is now the place to report audio and film expenditures as well as expenditures on other formats not designated in this category.

Item 43 asks for the total of all expenditures reported in items 37-42.

44-48. MISCELLANEOUS OPERATING EXPENDITURES

Item 44, preservation/conservation, is a continuing category of miscellaneous operating expenditures. Items 45 & 46, telephone/telecommunications and postage, incorporate items found in a separate category in recent years. Item 47, other miscellaneous operating expenditures, is a continuing item, but now includes library furniture & equipment and maintenance & operation, which have been separate items in recent years. Item 48, total miscellaneous operating expenditures, is the total of all expenditures reported in items 44-47.

49. TOTAL OPERATING EXPENDITURES. Item 49 is the total of items 36, 43, and 48.

50. CAPITAL OUTLAY. This item asks for the total of all funds spent to acquire or add to fixed assets, such as building sites, new buildings and building additions, new equipment (including major computer installations), initial book stock, furnishings for new or expanded buildings, and new vehicles. This item excludes replacement and repair of existing furnishings and equipment, regular purchase of library materials, and investments for capital appreciation.

PART V -- LIBRARY MATERIALS

51-55. LIBRARY MATERIALS (BY TYPE)

Items 51-55 ask for numbers of volumes or physical units (cassettes, disks, reels, etc.) in SELECTED categories, including books, periodicals (include volumes whether bound or unbound), and newspapers; audio materials, films, video materials, and computer software packages.

NOTE: Items asking for counts of uncataloged materials, government publications (if a separate collection), microforms, and "other" materials as well as the total of volumes or physical units across type have been dropped, owing to their lack of use.

56. CURRENT PERIODICAL & NEWSPAPER SUBSCRIPTIONS. Item 56 asks for the number of subscriptions received by the library, NOT the number of individual issues. Duplicate titles (multiple subscriptions to LIFE magazine for a main library and its branches, etc.) should be counted.

PART VI -- SERVICE PER TYPICAL WEEK

PUBLIC SERVICE HOURS PER TYPICAL WEEK

57. -- UNDUPLICATED. Consider both main library and branches using the following method. If a library is open from 9:00 am to 5:00 pm Monday-Friday, it should report 40 hours per week. If its branches are also open during those hours, the figure remains 40 hours. Should Branch A also be open one evening from 5:00-7:00, the total hours during which users can find service becomes 42. If Branch B is open the same hours on the same evening, the total remains 42; but, if it is open 2 more hours on another evening, the total becomes 44. Include bookmobiles, if applicable.

58. --DUPLICATED. Count both main library and branches using the following method. If the main library is open 60 hours per week, report 60 hours. If you also have 3 branch libraries open the same number of hours as the main library (regardless of whether or not all facilities are open at the same time), the weekly figure for the library and its branches is 240 hours (4 times 60). Include bookmobiles, if applicable.

59-61. PER TYPICAL WEEK

Items 59-61 ask for counts for a "typical week". A typical week is one in which the library is open its regular hours without any holidays. It is seven consecutive calendar days, Sunday-Saturday, or whatever days the library is open during that period. A typical week for most public libraries will fall between September and April. However, a typical week will have to be identified by each library based on its own patterns of use.

As an alternative to counting services provided for a "typical week", a decision might be made to count the number of times a service is provided for a typical week worth of days. For example, if a library is open 5 days per typical week, counts might be made on 5 randomly selected dates from throughout the year. These dates should meet the "typical week" criteria (regular hours, no holidays) and may be selected using a table of random numbers or by simply picking numbers for a month (1-12) and a date (1-31) "from a hat" until 5 valid dates have been selected.

59. LIBRARY VISITS PER TYPICAL WEEK. Report the total number of persons entering the library for a typical week, including those attending meetings, those who "just use the photocopier" or "go to the restroom", and those requiring no services.

60. IN-LIBRARY USE PER TYPICAL WEEK. Report the total number of materials used in the library, but not checked out. The simplest method for estimating in-library use is to post signs asking users not to re-shelve materials used in the library and to count these items before re-shelving them.

61. REFERENCE QUESTIONS HANDLED PER TYPICAL WEEK. Report the number of contacts with library users which involve the knowledge, use, recommendation, interpretation, or instruction in the use of one or more information sources by library staff. Information sources may include any type of library materials, online database searches, union catalogs or lists, or other persons within or beyond the library (including communication without referrals to other libraries). Please count all reference questions asked by all users, regardless of age.

NOTE: Please do not include directional questions in this count. Such contacts help someone use the library, but do not involve any information sources other than those which describe the library (library maps, directions to a certain department or area, staff member, building feature, or--of course--the restrooms.

PART VII -- ANNUAL SERVICE

62-64. ADULT, JUVENILE, AND TOTAL CIRCULATION.

Report circulation of adult and juvenile materials separately, if possible. Juvenile materials are those purchased for use by pre-school through 6th grade children. If separate circulation records are not kept, please estimate. If estimates cannot be made, report total circulation for item 64.

65-70. GROUP PROGRAMS/PRSENTATIONS AND ATTENDANCE (CHILDREN & ADULTS).

An information contact in which a staff member (or person invited by a staff member) provides information intended for a number of persons and planned in advance. Group programs or presentations may be either library instruction or cultural, recreational, or educational events. Events both on and off library premises are included, as long as they are sponsored by the library. Such service does not include meetings sponsored by other groups using library meeting space.

If possible, report separate numbers of programs/presentations and separate attendance figures for children and adults. If separate records are not kept, please estimate. If estimates cannot be made, report total programs/presentations for item 67 and total attendance for item 70.

71-72. INTERLIBRARY LOANS. Report materials provided to other libraries for item 71 and materials received from other libraries for item 72.

PART VIII -- LIBRARY FACILITIES

73. TOTAL SQUARE FEET OF LIBRARY SPACE. Report the total square feet for a library building or the portion of a building used as a library. Include space used for library office/work space.

74. SQUARE FEET OF OFFICE/WORK SPACE. Report the square feet of space used for library office/work space. This figure should be included in item 73. Office/work space includes walled offices and workrooms, cubicles or partitioned work spaces, service desks and associated areas which are not generally available for public use.

75. SEATING CAPACITY. Report the total seating capacity of the library's public spaces, including chairs at tables or carrels, other chairs and bench seats, and other furnishings intended to provide seating space.

76. NUMBER OF MEETING ROOMS. Report the number of meeting rooms or spaces within, adjacent to, or under the jurisdiction of the library. A larger room equipped with partitions to create smaller rooms should be counted as the latter. A meeting room used by library staff should be counted only if it is also available for public use.

77. SEATING CAPACITY IN ALL MEETING ROOMS. Report the seating capacity of all meeting rooms or spaces within, adjacent to, or under the jurisdiction of the library.

PART IX -- LIBRARY ROLES

78-85. RANKING THREE (3) MAJOR LIBRARY ROLES.

For several years, Colorado's public libraries have had statistics with which to compare themselves with other libraries serving comparable populations, operating expenditures, and the same regional library system. More and more, however, libraries need to compare themselves with others which play comparable roles in their communities.

Many public library decision-makers have selected roles for their libraries as part of their participation in the Public Library Association's planning and role-setting process. Where that has not occurred, most library directors are at least familiar with the recent American Library Association publication, PLANNING AND ROLE-SETTING FOR PUBLIC LIBRARIES. This publication describes 8 roles for public libraries, including: Community Activities Center, Community Information Center, Formal Education Support Center, Independent Learning Center, Popular Materials Library, Preschoolers Door to Learning, Reference Library, and Reference Center.

In items 78-85, the library is asked to identify its 3 MAJOR roles, based on either the results of the library's role-setting process or the director's judgment regarding the roles played currently by the library.

PART X -- TAX FORMS

86. MULTIPLE COPIES OF TAX FORMS FROM IRS. Indicate whether or not the library received multiple copies of tax forms from the Internal Revenue Service for distribution to the public. Responses to this item will permit the Public Library Development program to identify such libraries, some of which have expressed an interest in discussing the appropriateness of this service.

DATA ELEMENT INDEX

INTRODUCTION

This is the sixth edition of Statistics and Input-Output Measures for Colorado Public Libraries. This volume contains:

- library-by-library responses to all items in the "Colorado Public Libraries Annual Report 1989";
- summary statistics for seven ranges of population served and for the seven regional library systems;
- summary statistics for the state; and an
- index by data element.

In addition to high, low, and average figures, this year's summary statistics include three figures:

- the third quartile (3rd Q), which is the figure at or below which three-quarters of the reported figures on a given statistic fall;
- the median, or middle case, which is the figure above and below which half of the reported figures on a given statistic fall; and
- the first quartile (1st Q), which is the figure at or below which one-quarter of the reported figures on a given statistic fall.

These three figures prove valuable for several reasons:

- they reduce the impact of extreme values in a group;
- they provide three alternatives to average figures as bases for comparison; and
- they provide a readily understandable yardstick against which to assess individual library figures.

Readers whose libraries fall at the high or low ends of one of the populations served groups might wish to compare their libraries against the third or first quartile figures rather than the median or average.

Readers may also find it interesting to see in which quartile their libraries fall on selected statistics.

In addition, readers who are developing a plan for their libraries may find the new figures useful in setting quantitative objectives for performance.

Statistics and Input-Output Measures for Colorado Public Libraries 1989 includes the street and mailing addresses of public libraries as well as their phone and, where available, fax numbers.

New to this year's publication are several input-output measures initiated by Guidelines for Public Libraries in Colorado. Explanations of these new measures are incorporated at appropriate places in this publication's text. Likewise, the measures appear at appropriate places in the statistical tables.

Readers interested in receiving customized reports of these figures--including presentation-quality graphics and, very soon, maps--need only ask for them. A research request form is included at the end of this volume to facilitate such requests. Also, be reminded that, in addition to the Colorado Public Library Database, there is a Colorado Public Library Community Profile Database which contains the latest available demographic and economic data.

If you have any questions, comments, or suggestions regarding this publication, please contact either of us. Changes in the publication are made from year to year based on your input.

PLANNING, BUDGETING, AND PUBLIC RELATIONS WITH INPUT-OUTPUT MEASURES FOR PUBLIC LIBRARIES

A CASE STUDY

This essay reports input-output measures for Our Town Public Library and all public libraries serving comparable populations. (Similar comparisons might be made to libraries with similar operating expenditures or those located in the same Regional Library Service System.) A comparison of these figures has some noteworthy implications for planning, budgeting, and public relations by the anonymous "Our Town Public Library".

At least two general conclusions may be drawn from these two sets of input-output measures:

> On most input-output measures, Our Town Public Library compares poorly with all public libraries serving comparable populations.
>
> Lower service outputs generally follow from lower resource inputs. (Or, as the maxim goes, "you get what you pay for.")

OUTPUT MEASURES, 1989

While Our Town Public Library had the same registration per capita as the average library serving its size service population (.60), its other outputs were substantially poorer than those for the average library that size:

Output Measures, 1989	Our Town Public Library	Libraries Serving Like Service Pop.
Library Attendance Per Capita	1.10	3.30
In-Library Use Per Capita	0.10	1.50
Reference Per Capita	0.03	0.30
Circulation Per Capita	0.60	6.00
Turnover Rate	0.20	2.00
ILL Per 1,000 Circulation	41.00	14.00
Program Attendance Per 1,000 Served	60.00	160.00

During 1989, residents of Our Town Public Library made fewer visits to the library, used fewer materials in the library, circulated fewer materials, circulated a smaller percentage of the library's holdings, and attended fewer library programs.

In addition, more of the materials wanted by Our Town library users were borrowed from other libraries. Alone, a higher number of ILLs per 1,000 Circulation might be interpreted as an indicator that a library is doing a better job of resource sharing. In this case, however, correspondingly lower In-Library Use and Circulation Per Capita and Turnover Rate suggest that materials in the collection did not meet user needs.

INPUT MEASURES, 1989

To determine why Our Town residents receive so much less library service than residents of similarly sized communities, it may be useful to examine input measures for Our Town Public Library and its counterparts:

Input Measures, 1989	Our Town Public Library	Libraries Serving Like Service Pop.
FTE Staff Per 1,000 Served	0.25	0.50
Volumes Held Per Capita	3.00	3.00
Staff Expenditures Per Capita	$1.50	$5.50
Materials Expenditures Per Capita	$1.00	$2.00
Miscellaneous Expenditures Per Capita	$0.81	$2.81
Total Operating Expenditures Per Capita	$3.90	$9.30

Clearly, in 1989, Our Town Public Library was substantially more hard pressed for resources than its counterparts serving similarly sized populations. The size of Our Town library staff relative to that of comparable libraries appears to be quite inadequate. Our Town spent only about one-third as much on staff, so each of its staff served more than twice as many residents. Notably, there is no evidence that Our Town's lower use of materials is attributable to the size of its collection. The amount spent by Our Town on new materials, however, is significantly lower than the figure for comparable libraries. An even more obvious comparison is the fact that Our Town spent less than half as much on miscellaneous operating expenditures as its counterparts. This category may include any of the costs of maintaining and operating library facilities--including utilities, telephone and other telecommunications, furniture and equipment.

As large a discrepancy as this one may be explained in either of two ways. Miscellaneous operating expenditures may average higher for comparable libraries than Our Town, because of the number of branches involved. Our Town Public Library might have no branches, but libraries serving similarly sized populations might have an average of one branch (in addition to their main facilities). That, however, was not the case in this example. In fact, in-kind contributions from Our Town relieved the library from having to cover many of these costs in its budget. In-kind contributions toward miscellaneous operating expenses might include space for the library in the city hall and payment of utility and telephone/telecommunications bills by Our Town.

This in-kind factor explains a sizeable proportion of the discrepancy in Total Operating Expenditures Per Capita. In the case of Our Town, however, it does not explain lower staff and materials expenditures and the lower outputs of library service for which they appear to be responsible.

CONCLUSIONS

The findings for this case study indicate a library which lacks a plan for focusing its present and future resources on the mission and/or roles most appropriate for it to play in the community. This library should develop such a plan, using a process such as those described in PLA's Planning and Role Setting for Public Libraries (Chicago: ALA, 1987) or Timothy M. Nolan's Applied Strategic Planning in a Library Setting (San Diego: University Associates, 1987).

The library should also consult Guidelines for Public Libraries in Colorado (Denver: State Library & Adult Education Office, 1989) for suggested objectives, many quantified in terms of statistics reported in this publication.

Depending on the mission and/or roles selected by the library, productive strategies suggested by these data might include:

- developing a library budget request which includes increases in per capita funding for staff and materials to at least the average for its service population range and which includes figures reflecting the value of Our Town's in-kind contributions toward the library's miscellaneous operating expenses;

- promoting registration of borrowers as well as circulating and in-library use of the collection through a more aggressive public relations campaign;
- providing reference services to direct users to library materials which they may not be finding on their own;
- writing and implementing a collection development plan which establishes clear guidelines for building a collection that is more useful to the population served; and
- designing and offering public programs on topics and at times identified as desirable by users in the needs assessment.

A NEXT STEP

Having read how an analysis of input-output measures might be useful to the anonymous "Our Town Public Library", take a few minutes to complete the form on the following page by inserting the figures for each measure for your library and for a group of comparable libraries. Call the Library Research Service (303/866-6737 or 866-6906) for a custom report of these measures for any group of libraries in the state with which you would like to compare your library. Custom, computer-generated reports from this and other databases useful to public libraries are always available on request and at no charge.

Otherwise, comparable libraries based on population served, operating expenditures, or Regional Library Service System can be identified by consulting the lists of responding libraries at the end of this publication. Responding libraries are listed by population served, operating expenditures, and Regional Library Service System.

DEFINITIONS AND USES FOR INPUT-OUTPUT MEASURES

INPUT MEASURES

This section defines input measures and describes their possible uses.

FTE STAFF PER 1,000 SERVED

FTE Staff Per 1,000 Served relates the number of full-time equivalent (FTE) staff to the number of persons in the library's legal service area. It is the number of library staff in FTEs divided by the number of persons in that area.

Full-time equivalent (FTE) staff is the total number of hours per week worked by all staff divided by 40. In this context, full-time means 40 hours per week, regardless of how many hours per week the library is open.

FTE Staff Per 1,000 Served measures the library's level of staffing relative to its service population.

This input measure may be relevant whenever the adequacy of library staffing and staff funding are issues. It is particularly useful when the population or geographical area which the library is established to serve increases dramatically. When that happens, there should be a corresponding increase in staff just to offset the population increase.

FTE STAFF PER 10,000 CIRCULATION

FTE Staff per 10,000 Circulation relates the size of the library's staff to the number of loans they make. It is the number of staff in FTEs divided by total annual circulation in tens of thousands.

This statistic is a measure of workload on the staff relative to circulation. This figure will be of special interest to libraries playing the role of Popular Materials Library.

FTE STAFF PER 100 REFERENCE

FTE Staff per 100 Reference relates the size of the library's staff to the number of reference questions they handle. It is the number of staff in FTEs divided by total annual reference questions (i.e., reference questions per typical week multiplied by 52) in hundreds.

This statistic is a measure of workload on the staff relative to reference service. This figure will be of special interest to libraries playing the roles of Reference Library, Research Center, and Community Information Center.

VOLUMES HELD PER CAPITA

Volumes Held Per Capita relates the number of volumes or units in the library's collection to the number of persons it was established to serve. It is the number of print volumes as well as non-print units held by the library divided by its legal service area population.

This figure indicates the average number of volumes held for each person in the library's legal service area population.

This input measure may be relevant whenever the size of the library's collection is an issue. It is particularly useful when the population or geographical area which the library is established to serve changes dramatically. For example, in the latter case, there should be corresponding increases in Materials Expenditures as well as Volumes Held Per Capita just to maintain the existing ratio of holdings to persons served.

PERIODICAL SUBSCRIPTIONS PER 1,000 SERVED

Periodicals Subscriptions per 1,000 Served relates the number of current periodicals subscriptions carried by the library to the size of the population it serves. It is the number of current periodical subscriptions divided by the population served in thousands.

This statistic is a measure of the size of the library's current periodicals collection relative to the population it serves. This figure will be of special interest to libraries playing the role of Formal Education Support Center, Independent Learning Center, Reference Library, and Research Center.

VIDEOS PER 1,000 SERVED

Videos per 1,000 Served relates the number of video materials in the library's collection to the size of the population it serves. It is the number of video cassettes (or disks) divided by the population served in thousands.

This statistic is a measure of the size of the library's video collection relative to the population it serves. If the video collection focuses on entertainment fare, this figure may be of special interest to libraries playing the Popular Materials Center role. If the collection focuses on educational or instructional fare, this figure may be of special interest to libraries playing the Formal Education Support Center role.

A-V UNITS PER 1,000 SERVED

A-V Units per 1,000 Served relates the number of audio-visual materials in the library's collection to the size of the population it serves. It is the number of A-V units (e.g., films, filmstrips, slide or slide-tape sets) divided by the population served in thousands.

This statistic is a measure of the size of the library's audio-visual collection relative to the population it serves. Assuming that the collection focuses on educational or instructional fare, this figure may be of special interest to libraries playing the Formal Education Support Center role.

ACQUISITION RATE

Acquisition Rate relates the number of new acquisitions to the overall size of the collection. It is the number of newly acquired volumes divided by the total number of volumes held by the library.

This figure indicates the percentage of the library's collection which was acquired during the year. To that extent, it is a measure of the growth of the collection, if not its currency. (All newly acquired titles are not necessarily newly published.)

Acquisition rate may be relevant whenever the growth or currency of the collection is an issue. When using this figure to address such issues, it may be useful to relate it to the input measure, materials expenditures per capita, or output measures which indicate the impact of such spending on use of the collection (such as circulation and in-library use per capita, ILL net lending rate, and ILLs per 1,000 circulation).

STAFF EXPENDITURES PER CAPITA

Staff Expenditures Per Capita relates the amount of library funds spent on staff to the number of persons the library was established to serve. It is the dollar amount paid in salaries, wages, and benefits divided by the library's legal service area population.

This figure indicates the average cost per person of staffing the library.

This input measure may be relevant whenever the adequacy of library staffing or staff performance are issues. The cost-effectiveness of library services may be demonstrated by relating Staff Expenditures Per Capita to output measures which indicate the amount of service received (such as, Circulation and Reference Transactions Per Capita, and Program Attendance Per 1,000 Served).

It is also important to review this measure whenever the population of the library's legal service area changes dramatically. For example, if that population increases dramatically, there should be a corresponding increase in Staff Expenditures Per Capita just to maintain the existing level of support.

MATERIALS EXPENDITURES PER CAPITA

Materials Expenditures Per Capita relates the amount of library funds spent on materials for the collection (including print items, such as books and periodicals, and non-print items, such as audio and video cassettes and films) to the number of persons the library was established to serve. It is the dollar amount spent on such materials divided by the library's legal service area population.

This figure indicates the average cost per person of purchasing (but not processing) newly acquired materials.

Materials Expenditures Per Capita may be relevant whenever the size or usefulness of the collection is an issue. When using this figure to address such issues, it may be useful to relate it to other input measures which indicate the quantity of materials available to users (i.e., Volumes Held Per Capita) and to output measures which indicate the usefulness of those materials (such as Circulation Per Capita, Turnover Rate, ILL Net Lending Rate, and ILLs Per 1,000 Circulation).

It is also important to review Materials Expenditures Per Capita whenever the population of the library's legal service area changes dramatically. For example, if the population to be served increases dramatically, there should be a corresponding increase in Materials Expenditures Per Capita just to maintain the existing level of support.

MISCELLANEOUS EXPENDITURES PER CAPITA

Miscellaneous Expenditures Per Capita relates the amount of library funds spent for purposes other than staff & materials costs to the number of persons the library is established to serve. It may include the dollar amount spent on miscellaneous operating expenses (including utilities, telephone and telecommunications, and office supplies) divided by the library's legal service area population.

This figure approximates the average cost per person of running library facilities.

This input measure may be relevant whenever the economy or efficiency of the library's day-to-day operations is an issue. The cost-effectiveness of library operations may be demonstrated by relating Miscellaneous Expenditures Per Capita to those output measures which best reflect the range of most frequently used services & programs the library provides to its users.

It is also important to review this measure whenever the population of the library's legal service area changes dramatically. For example, if the population to be served increases dramatically, there should be a corresponding increase in Miscellaneous Expenditures Per Capita just to maintain the existing level of support.

OPERATING EXPENDITURES PER CAPITA

Operating Expenditures Per Capita relates the total amount of library funds spent for all purposes to the number of persons the library is established to serve. It includes the dollar amount spent on staff, materials, and miscellaneous expenses divided by the library's legal service area population.

This figure approximates the average cost per person of running the library.

Operating Expenditures Per Capita may be relevant whenever the economy or efficiency of the library's overall operation is an issue. The cost-effectiveness of library operations may be demonstrated by relating Operating Expenditures Per Capita to those output measures which best reflect the range of most frequently used services and programs the library provides to its users.

It is also important to review this measure whenever the population of the library's legal service area changes dramatically. For example, if the population to be served increases dramatically, there should be a corresponding increase in Operating Expenditures Per Capita just to maintain the existing level of support.

STAFF EXPENDITURES AS A PERCENT OF OPERATING EXPENDITURES

Staff Expenditures as a Percent of Operating Expenditures is the sum of all staff expenditures for salaries, wages, and benefits divided by the sum of all operating expenditures for staff, materials, and other purposes.

This measure indicates the proportion of the library's annual operating expenditures which is spent to compensate staff.

Generally, this figure comprises the single largest proportion of operating expenditures. Accordingly, the higher this figure the better. If this figure is extremely high, however, it may indicate a lack of adequate funding for other aspects of library operations; and, if extremely low, it may indicate a lack of commitment to having professionally trained library staff--indeed, in the most extreme cases, any staff at all.

This measure is especially important for libraries whose chosen roles are particularly labor-intensive (e.g., reference library, research center).

MATERIALS EXPENDITURES AS A PERCENT OF OPERATING EXPENDITURES

Materials Expenditures as a Percent of Operating Expenditures relates the amount spent on the library's collection to what is spent for overall operations. It is the amount spent on library materials divided by the amount spent for all operating expenses (including materials costs).

This measure indicates the proportion of the library's operating expenditures which are for materials. To that extent, it may indicate the strength of the library's commitment to its collection. Notably, however, an extremely high figure on this measure is more likely an indicator of the library's lack of commitment to paying staff, another--in fact, for most libraries, the major--cost center. Interpretation of this measure must also take into consideration what library expenses fall in the "other operating expenditures" category. If a library does a large amount of database searching, for instance, it may have hefty bills to online utilities and for telecommunications. It is best to consider the "other" costs carried by libraries in a prospective comparison group, and to include only those which do not have exceptional "other" expenses.

OUTPUT MEASURES

The output measures defined here include seven of those covered by PLA's Output Measures for Public Libraries (second edition). Each measure includes: a definition, possible uses, and the public library roles with which they are most closely associated. (See PLA's Planning and Role Setting for Public Libraries for detailed descriptions of these roles and a process for selecting and using them to plan for a public library.) The table on the two following pages summarizes relationships between input-output measures and public library roles.

REGISTRATION PER CAPITA

Registration Per Capita relates the number of persons registered as borrowers to the number of persons the library is established to serve. It is the number of individual registrations divided by the library's legal service area population.

This measure indicates the percentage of the library's potential users who have at least demonstrated an intent to borrow materials from the collection.

NOTE:

Although all registration figures reported by Colorado public libraries are included in this document, figures for libraries which have not updated their registration files in the past three years should be regarded as being of questionable validity.

This output measure may be relevant whenever public awareness of the library is called into question. Assuming a library's registration file is up-to-date, this figure indicates the percentage of potential users who--at the very least--know the library exists and have implied an intent to use it. High Registration Per Capita may also be useful in justifying increases in input measures (such as Staff, Materials, and/or Miscellaneous Expenditures Per Capita).

A library which plays the Popular Materials Center role will strive for a high score on this output measure.

PUBLIC LIBRARY ROLES AND

INPUT-OUTPUT MEASURES

Public Library Role	Measures
Community Activities Center	Library visits per capita
	Program attendance per 1,000 served
Community Information Center	Library visits per capita
	Reference per capita
	Reference per hour
	Program attendance per 1,000 served
	FTE staff per 100 reference
Formal Education Support Center	In-library use per capita
	In-library use per hour
	Reference per capita
	Reference per hour
	Turnover rate
	ILL net lending rate
	ILLs per 1,000 circulation
	FTE staff per 100 reference
Independent Learning Center	In-library use per capita
	In-library use per hour
	Turnover rate
	ILL net lending rate
	ILLs per 1,000 circulation
Popular Materials Library	Circulation per capita
	Circulation per hour
	Turnover rate
	FTE staff per 10,000 circulation
Preschoolers Door to Learning	Library visits per capita
	Circulation per capita
	Turnover rate
	Program attendance per 1,000 served

PUBLIC LIBRARY ROLES AND INPUT-OUTPUT MEASURES

Public Library Role	Measures
Reference Library	Library visits per capita
	In-library use per capita
	In-library use per hour
	Reference per capita
	Reference per hour
	FTE staff per 100 reference
Research Center	In-library use per capita
	In-library use per hour
	Reference per capita
	Reference per hour
	ILL net lending rate
	ILLs per 1,000 circulation
	FTE staff per 100 reference

LIBRARY VISITS PER CAPITA

Library Visits Per Capita relates the number of visits made to the library to the number of persons the library is established to serve. It is attendance at the library during a typical week multiplied by 52 (the number of weeks in a year) divided by the library's legal service area population.

This measure may be estimated by counting the number of persons (excluding library staff, of course) who enter--or, if preferred, leave--the library during a typical week. A typical week is one during which the library is open its regular hours (no holidays) and which is neither extraordinarily busy nor slow.

Library Visits Per Capita indicates the average number of library visits per person served.

It is a better measure of public awareness of the library than Registration Per Capita. While registration statistics on which the latter is based may be out-of-date and, therefore, questionably valid, attendance statistics on which the former is based reflect actual visits to the library. Taken with In-Library Use, Reference, and Circulation Per Capita, and Program Attendance Per 1,000 Served, Library Visits Per Capita can be used to develop an annual profile of library use.

A library will strive for a high score on this measure if its roles include Community Activities or Information Center, Preschoolers' Door to Learning, or Reference Library.

CIRCULATION PER CAPITA

Circulation Per Capita relates the number of loans of library materials to the number of persons the library is established to serve. It is the number of loans divided by the library's legal service area population.

This measure indicates the average number of loans made to each resident of the library's legal service area annually.

This output measure may be relevant whenever the size of the materials budget, the size of the collection, or its level of use is an issue. It may be useful to examine the relationship of this measure to selected input & output measures. For example, lower Circulation Per Capita is a likely result of lower Materials Expenditures & Volumes Held Per Capita. It is also likely to lead to more ILLs Per 1,000 Circulation.

A library which plays either the Popular Materials Center or Preschoolers' Door to Learning role will strive for a high score on this output measure.

REFERENCE PER CAPITA

Reference Per Capita relates the number of information contacts in which a staff member involves information sources to the number of persons the library is established to serve. It is the number of reference transactions per typical week multiplied by 52 divided by the library's legal service area population.

This measure indicates the average number of times a resident of the library's legal service area received staff assistance in using information sources available at or accessible through the library.

Reference Per Capita may be relevant whenever the impact of reference service is an issue. Comparing this figure to Circulation and In-Library Use Per Capita may be useful in assessing the reference desk as an access point for information available in the local collection. Comparing it to ILLs Per 1,000 Circulation and ILL Net Lending Rate may be useful in assessing access via the reference desk to information that may not be available locally.

A library will strive for a high score on this output measure if its roles include Community Information Center, Reference Library, or Research Center.

IN-LIBRARY USE PER CAPITA

In-Library Use Per Capita relates the number of materials used in the library (but not checked out) to the number of persons the library is established to serve. It is in-library use per typical week multiplied by 52 (the number of weeks in a year) divided by the library's legal service area population.

In-library use per typical week may be determined by counting the number of items to be reshelved or refiled during a typical week (that is, one during which the library is open its regular hours--no holidays--& which is neither extraordinarily busy nor slow) or a week's worth of typical days (for example, Monday the first week, Tuesday the second week, and so on).

This measure indicates the average number of items used in the library (but not checked out) per resident of the library's legal service area.

This output measure may be relevant whenever evidence of library use is required. To the extent that people turn to the library as a source of useful information (rather than a repository of recreational reading), In-Library Use Per Capita is at least as important to consider as Circulation Per Capita.

A library will strive for a high score on this output measure if its roles include: Formal Education Support Center, Independent Learning Center, Reference Library, or Research Center.

CIRCULATION PER HOUR

Circulation per Hour relates the number of loans of library materials to the number of hours the library is open to the public. It is total annual circulation divided by 52 (weeks per year) divided by hours open per week.

This statistic is a measure of library traffic relative to circulation. This figure will be of special interest to libraries playing the role of Popular Materials Library.

REFERENCE QUESTIONS PER HOUR

Reference Questions per Hour relates the number of reference questions handled by the library to the number of hours it is open to the public. It is the total annual number of reference questions divided by 52 divided by hours open per week.

This statistic is a measure of library traffic relative to reference. This figure will be of special interest to libraries playing the roles of Community Information Center, Independent Learning Center, Reference Library, and Research Center.

IN-LIBRARY USE PER HOUR

In-Library Use per Hour relates the number of materials used in the library to the number of hours it is open to the public. It is in-library materials use per typical week divided by hours open per week.

This statistic is a measure of library traffic relative to in-library use of materials. This figure will be of special interest to libraries playing the roles of Community Information Center, Formal Education Support Center, Independent Learning Center, Reference Library, and Research Center.

TURNOVER RATE

Turnover Rate relates the number of loans of library materials to the size of the collection. It is the number of loans divided by the number of volumes held in the collection at the end of the year.

Turnover rate indicates how often each item in the collection was loaned, assuming that circulation was evenly distributed among the library's holdings.

This measure may be relevant whenever use of the collection is an issue. In that case, it may be useful to compare this figure to selected inputs (i.e., volumes held per capita) and outputs (such as circulation per capita and ILLs per 1,000 circulation).

A library will strive for a high score on this output measure if its roles include Formal Educational Support Center, Independent Learning Center or Popular Materials Center.

ILL NET LENDING RATE

ILL Net Lending Rate relates the number of materials provided to other libraries through interlibrary loan to the number of materials borrowed from other libraries thorugh interlibrary loan. It is the number of items loaned divided by the number of items borrowed.

This measure indicates items loaned as a percentage of items borrowed.

This output measure may be relevant whenever the nature of the library's participation in interlibrary loan activities is an issue. It indicates whether the library does more lending (scoring over 1.0) or more borrowing (scoring less than 1.0). "Net Borrowers" may use this figure as evidence of what they gain from participating in such activities, while "net lenders" may use it to argue for the maintenance of strong collections.

A library will strive for a high ILL Net Lending Rate if its roles include Formal Education Support, Independent Learning, or Research Center.

ILLS PER 1,000 CIRCULATION

ILLs Per 1,000 Circulation relates the number of materials borrowed from other libraries to the number of materials from the local collection made available to borrowers. It is the number of ILL requests divided by total circulation multiplied by 1,000.

This measure indicates the number of interlibrary loans for every 1,000 items circulated from the local collection.

On the one hand, higher ILLs Per 1,000 Circulation might indicate better performance by the library as an access point for information not contained in the local collection. On the other, a lower figure might indicate that the local collection was doing a better job of meeting user needs. Which interpretation to make of this statistic would depend on which issue was at hand as well as the actual amount of ILL and circulation activity per capita. (Higher levels of ILL and circulation activity would favor the former interpretation, while lower levels of such activity would favor the latter interpretation.)

A library will strive for a high score on this output measure if its roles include Formal Education Support Center, Independent Learning Center, or Research Center.

PROGRAM ATTENDANCE PER 1,000 SERVED

Program Attendance Per 1,000 Served relates attendance of scheduled presentations which are sponsored by the library and deal with information services (on or off library premises) to the population the library is established to serve. It is program attendance divided by the library's legal service area population in thousands.

Program Attendance Per 1,000 Served indicates the number of residents per 1,000 in the library's legal service area who attended a library program during the year.

This output measure may be relevant whenever the library needs to demonstrate its services to groups (in contrast to traditional services to individuals, such as circulation and reference).

A library will strive for a high score on this output measure if its roles include Community Activities Center or Independent Learning Center.

COLORADO PUBLIC LIBRARIES

ANNUAL REPORT FORM

AND INSTRUCTIONS

COLORADO PUBLIC LIBRARIES ANNUAL REPORT 1989

Incorporating Items for the Federal/State Cooperative System for Public Library Data

RESPONDENT IDENTIFICATION

Library____________________________________

Street/Mailing Address____________________________________

City__________________ County__________________ Zip Code____________

Phone: (____) __________________ Fax: (____)__________________

Person Completing Report____________________________________

PART I - GENERAL INFORMATION

(See Instructions, p. 1-2)

1. Specify the legal service area of this library ____________________________________

2. Has the library updated its registered borrower file at least once during the past three years? (Circle Yes or No.) YES NO

3.	Registered borrowers:		*Number*
	a.	Adult (including young adult, if applicable)	________
	b.	Juvenile	________
	c.	TOTAL INDIVIDUAL REGISTRATION (Sum of a. and b.)	________
	d.	Family/household registration	________
4.	Service outlets:		
	a.	How many service outlets does this library administer? (Include the only or central library as well as any branches or library district members that do not report separately.)	________
	b.	Bookmobiles (number of vehicles, not stops)	________
	c.	Other service outlets (deposit collections in nursing homes, hospitals, jails, etc.)	________

PART II - PAID LIBRARY STAFF

(See Instructions, p. 2 and Work Sheet, p. 3)

		NUMBER OF FTE (Full-Time Equivalents)
5.	All librarians	________
6.	All other staff (except plant operations, security and maintenance staff)	________
7.	TOTAL PAID LIBRARY STAFF (Sum of 5 and 6)	________
8.	Librarians with ALA-accredited MLS degrees (included in 5)	________

PART III - LIBRARY INCOME

(See Instructions, pp. 2 and 4)

9. Local income: *WHOLE DOLLARS ONLY*

		City	County	District
a-c.	General fund	$________	$________	$________
d-f.	Sales tax	$________	$________	$________
g-i.	Mill levy	$________	$________	$________
j.	Mill levy rate (if applicable)			________
k.	Other local gov't income (specify source)________________			$________
l.	TOTAL LOCAL INCOME (Sum of 9a. - 9i. and 9k.)			$________

10. State income (county equalization, payment for lending, Colorado Endowment for the Humanities, etc.) $________

11. Federal income (Library Services and Construction Act [LSCA], National Endowment for the Humanities. etc.) $________

12. Private foundation grants and corporate giving (El Pomar Foundation, Coors, etc.) $________

13. Library-generated income (if retained by library) (photocopying, fines, book sales, fee-based services, reciprocal borrowing, etc.) $________

14. Individual gifts and donations $________

15 Other income (please specify source)________________ $________

16. TOTAL LIBRARY INCOME (Sum of 9l. - 15) $________

17. Estimated value of in-kind resources (only if counted for county equalization eligibility) $________

PART IV - LIBRARY EXPENDITURES
(See Instructions, pp. 4-5)

18. Staff expenditures:

   a. Salaries and wages (excluding plant operation, security and maintenance staff) $________

   b. Employee benefits (excluding plant operation, security and maintenance staff) $________

   c. TOTAL STAFF EXPENDITURES (Sum of 18a.- 18b.) $________

19. Materials expenditures:

   a. Print materials (excluding periodical subscriptions, microforms) $__________

   b. Periodical subscriptions (all formats) $__________

   c. Computer software $__________

   d. Videocassettes, videodisks $__________

   e. Other materials (audio, film, microforms, etc.) $__________

   f. TOTAL MATERIALS EXPENDITURES (Sum of 19a. - 19e.) $________

20. Miscellaneous operating expenditures:

   a. Preservation/conservation (binding, re-binding, acid-free boxes, etc.) $__________

   b. Telephone, telecommunications costs $__________

   c. Postage $__________

   d. Other costs (utilities; plant operation, security and maintenance salaries; furniture and equipment, supplies, etc.) $__________

   e. TOTAL MISCELLANEOUS OPERATING EXPENDITURES (Sum of 20a. - 20d.) $________

21. TOTAL OPERATING EXPENDITURES (Sum of 18c., 19f, and 20e.) $________

22. Capital outlay (new building, renovation, etc.) $________

PART V - LIBRARY MATERIALS
(See Instructions, pp. 5-6)

Volumes or Physical Units
Held at End of 1989

23. Books, periodicals, and newspapers

24. Audio materials (records, cassettes, compact disks, etc.)

25. Films

26. Video materials (cassettes, disks, etc.)

27. Computer software packages

28. Current periodical and newspaper subscriptions (including duplicate titles)

PART VI - SERVICE PER TYPICAL WEEK
(See Instructions, pp. 6-7)

29. Public service hours per typical week: *Number*

    a. **Unduplicated** (if reporting for a library with branches or all libraries in a library district, do not count overlapping hours)

    b. **Duplicated** (if reporting for a library with branches or all libraries in a library district, do count overlapping hours)

30. Library visits per typical week

31. In-library use per typical week

PART VII - ANNUAL SERVICE
(See Instructions, pp. 7-8)

32. Circulation: *Number*

    a. Adult

    b. Juvenile

    c. TOTAL CIRCULATION (Sum of 33a. and 33b.)

33. Reference questions handled annually (or typical week estimate times 52)

Number

34. Group programs/presentations:

a. Childrens (story hour, summer reading, etc.) ________

b. Adult (including young adults, if applicable - "Let's Talk About It", literacy, etc.) ________

c. TOTAL GROUP PROGRAMS/PRESENTATIONS (Sum of 34a. and 34b.) ________

35. Group program/presentation attendance:

a. Children attending programs/presentations ________

b. Adults (including young adults, if applicable) attending programs/presentations ________

c. TOTAL GROUP PROGRAM/PRESENTATION ATTENDANCE (Sum of 35a. and 34b.) ________

36. Interlibrary loans:

a. Provided to other libraries ________

b. Received from other libraries ________

PART VIII - STAFF SALARIES AND WAGES

(See Instructions, p. 8)

	Position	*Low Annual Salary*	*Hours Paid/ Week**	*High Annual Salary*	*Hours Paid/ Week**	*Requires MLS Degree? (Circle One)*

PART IX - LIBRARY'S RELATIONSHIP TO LOCAL GOVERNMENT
(See Instructions, p. 9)

44. Who supervises the library director? (Check one of the following responses which best describes your library's relationship to local government.)

- a. City council, county commissioner, or school board ☐
- b. City manager, county administrator, or any level of school administrator (e.g., superintendent, principal, director of curriculum and instruction) ☐
- c. Assistant city manager, assistant county administrator, or city or county department head (e.g., parks and recreation) ☐
- d. Library board which reports to city, county, and/or school district ☐
- e. Library board independent of any local government ☐
- f. Other - (Please specify) ______________________ ☐

PART X - LIBRARY AUTOMATION AND TELECOMMUNICATIONS
(See Instructions, p. 9)

45. Does your library have at least one telephone located in the library? (Circle Yes or No.) YES NO

46. How many microcomputers does your library have for:

- a. Staff use only? ______
- b. Public use only? ______
- c. Staff and public use? ______

47. Does your library own a modem? (Circle Yes or No.) YES NO

48. Which of the following functions are computerized in your library? (Check as many as apply.)

- a. Acquisitions ☐
- b. Cataloging ☐
- c. Circulation ☐
- d. Searching Colorado library databases (e.g., CARL, IRVING, MARMOT) ☐
- e. Searching other databases (e.g., OCLC, DIALOG) ☐
- f. Office automation (e.g., word processing, spreadsheets, database management, desktop publishing, electronic mail) ☐

INSTRUCTIONS

COLORADO PUBLIC LIBRARIES ANNUAL REPORT 1989

PART I -- GENERAL INFORMATION

1. SPECIFYING THE LEGAL SERVICE AREA. The library's legal service area is the geographical area (i.e., town, city, county, or school district) for which it has been established to offer services and from which (or on behalf of which) the library derives its primary income PLUS any areas served under contract.

The legal service area of a public library DOES NOT include the legal service area of another public library with which the reporting library has a reciprocal borrowing agreement. Only the jurisdiction for which the library is the SOLE or PRIMARY source of library service should be claimed.

An area is served under contract if the reporting library or its jursidiction has a written agreement with another library or jurisdiction to provide library services to all or a specified part of the population residing in the other jurisdiction. For instance, a city public library may have a written agreement with its county to provide library service to a percentage of the population living in unincorporated areas of the county. Presumably, there will be a written agreement between the governmental units involved in such cases.

EXAMPLES: Population of Coloradoville.
Population residing in Coloco school district.
Population of Coloradoville plus 10% of population in unincorporated areas of Coloco county.

3. ADULT, JUVENILE, & INDIVIDUAL REGISTRATION.
FAMILY/HOUSEHOLD REGISTRATION.

Items 3a. and 3b. ask for a breakdown of individual registration by adult (including young adult, if applicable) and juvenile. Item 3c. asks for the sum of those two items or, if adult and juvenile figures are unavailable, individual registration alone.

Item 3d. asks for family or household registrations, only where such registrations take the place of individual registration.

4. SERVICE OUTLETS.

Item 4a. asks for a count of the only or central library and any branches or library district members that do not report separately.

PART II -- LIBRARY STAFF

5-7. LIBRARIANS, OTHER STAFF, TOTAL PAID STAFF.

Item 5 asks for the number of paid "librarians" in full-time equivalents (FTEs), WHETHER OR NOT they have the Master of Library Science (MLS) degree accredited by the American Library Association.

See the work sheet on the following page for easy-to-follow directions for calculating FULL-TIME EQUIVALENTS.

Item 6 asks for all other paid staff in FTEs, excluding plant operation, security, and maintenance staff. Item 7 is the sum of those two figures.

8. LIBRARIANS WITH ALA-ACCREDITED MLS. Item 8 asks for a separate FTE count of librarians who have ALA-accredited MLS degrees. These FTEs should also have been counted in item 5.

PART III -- LIBRARY INCOME

9a.-9i. LOCAL INCOME BY SOURCE (CITY, COUNTY, LIBRARY DISTRICT) & TYPE (GENERAL FUND, SALES TAX, MILL LEVY).

Local income amounts are requested by both source and type. Please provide these figures in items 9a.-9i.

9j. MILL LEVY RATE. If a figure is entered for item 9g., 9h. or 9i, enter here the mill levy rate on which that figure is based.

9k. OTHER LOCAL INCOME. Item 9k. asks for any other local income, excluding private foundation grants and corporate giving, library-generated income, and individual gifts and donations, all of which are requested in subsequent items.

9l. TOTAL LOCAL INCOME. Item 9l. asks for the total of items 9a. - 9i. and item 9k.

WORK SHEET FOR
CALCULATING FULL-TIME
EQUIVALENT (FTE) STAFF

Items 5-8 ask for staffing figures in FULL-TIME EQUIVALENTS --or FTEs. For FTE figures to be comparable across libraries, they must use the same base number of hours per week to define "full-time". For that reason, a 40 hour work week is assumed in these figures--even for libraries which are not open 40 hours per week. So, even though a staff member may work all of the hours the library is open, if that number of hours is less than 40, she or he should not be counted as 1.0 FTE for purposes of this report.

The following sample work sheet may be useful in determining the number of FTEs to report for each of items 5-8 for this library.

EXAMPLE

STAFF MEMBER	HOURS PER WEEK			
1. Jane Smith	20			
2. John Brown	20			
3. Nancy Jones	10			
4. Bill White	10			
TOTAL	60	/40	=	1.5

WORK SHEET

STAFF MEMBER	HOURS PER WEEK			
1.				
2.				
3.				
4.				
5.				
6.				
7.				
8.				
9.				
10.				
TOTAL (1-10)	_____	/40	=	_____

10. STATE INCOME. Item 10 asks for the total of all income received by the library from state sources. This includes county equalization grants, payment-for-lending reimbursements, Colorado Endowment for the Humanities grants, etc. It excludes federal funds distributed by the state, such as Library Services and Construction (LSCA) Act grants, etc.

11. FEDERAL INCOME. Item 11 asks for the total of all income received by the library from federal sources. This includes grants from LSCA, National Endowment for the Humanities, etc.

12. PRIVATE FOUNDATION GRANTS & CORPORATE GIVING. Item 12 asks for the total of all income raised from private foundations, corporations, businesses, non-profit organizations, and other private groups. It excludes both in-kind support from private groups and cash gifts and donations from individuals.

13. LIBRARY-GENERATED INCOME (if retained by the library). Item 13 asks for the total of all income raised by the library through its own activities. Such activities include photocopying, fines, book sales, fee-based services, reciprocal borrowing, etc.

14. INDIVIDUAL GIFTS & DONATIONS. Item 14 asks for the total of all income received as cash gifts and donations from individuals. It excludes both funds received from private foundations, corporations, businesses, non-profit associations, and other groups and in-kind support from groups or individuals.

15. OTHER LIBRARY INCOME. Item 15 asks for the total of all income not reported in items 9a.-14.

16. TOTAL LIBRARY INCOME. Item 16 is the total of items 91.-15.

17. IN-KIND RESOURCES. Item 17 asks for an estimate of the amount of tax dollars represented by resources provided on an in-kind basis, which the library wishes to be counted toward local maintenance of effort for county equalization eligibility.

PART IV -- LIBRARY EXPENDITURES

18. SALARIES & WAGES, EMPLOYEE BENEFITS, AND TOTAL STAFF EXPENDITURES.

Items 18a. and 18b. ask for expenditures on staff salaries & wages and employee benefits separately, while item 18c. is the total of those two items. If separate figures for salaries & wages and employee benefits are not available, enter total staff expenditures for item 18c.

19. MATERIALS EXPENDITURES (BY TYPE AND TOTAL)

Items 19a.-19c. ask for expenditures on print materials, periodical subscriptions, microforms, and computer software.

Item 19d. is a new item which asks for expenditures on video materials alone. (In recent years, expenditures on video materials have been combined with audio materials and films.) Separating out video expenditures will make it possible to begin tracking the impact on library budgets of this increasingly popular format.

Item 19e., other materials expenditures, is now the place to report audio and film expenditures as well as expenditures on other formats not designated in this category.

Item 19f. asks for the total of all expenditures reported in items 19a.-19e.

20. MISCELLANEOUS OPERATING EXPENDITURES

Item 20a., preservation/conservation, is a continuing category of miscellaneous operating expenditures. Items 20b. and 20c., telephone/telecommunications and postage, incorporate items found in a separate category in recent years. Item 20d., other miscellaneous operating expenditures, is a continuing item, but now includes library furniture & equipment and maintenance & operation, which have been separate items in recent years. Item 20e., total miscellaneous operating expenditures, is the total of all expenditures reported in items 20a.-20d.

21. TOTAL OPERATING EXPENDITURES. Item 21 is the total of items 18c., 19f., and 20e.

22. CAPITAL OUTLAY. This item asks for the total of all funds spent to acquire or add to fixed assets, such as building sites, new buildings and building additions, new equipment (including major computer installations), initial book stock, furnishings for new or expanded buildings, and new vehicles. This item excludes replacement and repair of existing furnishings and equipment, regular purchase of library materials, and investments for capital appreciation.

PART V -- LIBRARY MATERIALS

23-27. LIBRARY MATERIALS (BY TYPE)

Items 23-27 ask for numbers of volumes or physical units (cassettes, disks, reels, etc.) in SELECTED categories, including books, periodicals (include volumes whether bound or unbound), and newspapers; audio materials, films, video materials, and computer software packages.

NOTE: Items asking for counts of uncataloged materials, government publications (if a separate collection), microforms, and "other" materials as well as the total of volumes or physical units across type have been dropped, owing to their lack of use.

28. CURRENT PERIODICAL & NEWSPAPER SUBSCRIPTIONS. Item 28 asks for the number of subscriptions received by the library, NOT the number of individual issues. Duplicate titles (multiple subscriptions to LIFE magazine for a main library and its branches, etc.) should be counted.

PART VI -- SERVICE PER TYPICAL WEEK

PUBLIC SERVICE HOURS PER TYPICAL WEEK

29a. --UNDUPLICATED. Consider both main library and branches using the following method. If a library is open from 9:00 am to 5:00 pm Monday-Friday, it should report 40 hours per week. If its branches are also open during those hours, the figure remains 40 hours. Should Branch A also be open one evening from 5:00-7:00, the total hours during which users can find service becomes 42. If Branch B is open the same hours on the same evening, the total remains 42; but, if it is open 2 more hours on another evening, the total becomes 44. Include bookmobiles, if applicable.

29b. --DUPLICATED. Count both main library and branches using the following method. If the main library is open 60 hours per week, report 60 hours. If you also have 3 branch libraries open the same number of hours as the main library (regardless of whether or not all facilities are open at the same time), the weekly figure for the library and its branches is 240 hours (4 times 60). Include bookmobiles, if applicable.

30-31. PER TYPICAL WEEK

Items 30-31 ask for counts for a "typical week". A typical week is one in which the library is open its regular hours without any holidays. It is seven consecutive calendar days, Sunday-Saturday, or whatever days the library is open during that period. A typical week for most public libraries will fall between September and April. However, a typical week will have to be identified by each library based on its own patterns of use.

As an alternative to counting services provided for a "typical week", a decision might be made to count the number of times a service is provided for a typical week worth of days. For example, if a library is open 5 days per typical week, counts might be made on 5 randomly selected dates from throughout the year. These dates should meet the "typical week" criteria (regular hours, no holidays) and may be selected using a table of random numbers or by simply picking numbers for a month (1-12) and a date (1-31) "from a hat" until 5 valid dates have been selected.

30. LIBRARY VISITS PER TYPICAL WEEK. Report the total number of persons entering the library for a typical week, including those attending meetings, those who "just use the photocopier" or "go to the restroom", and those requiring no services.

31. IN-LIBRARY USE PER TYPICAL WEEK. Report the total number of materials used in the library, but not checked out. The simplest method for estimating in-library use is to post signs asking users not to re-shelve materials used in the library and to count these items before re-shelving them.

NOTE: Please do not include directional questions in this count. Such contacts help someone use the library, but do not involve any information sources other than those which describe the library (library maps, directions to a certain department or area, staff member, building feature, or--of course--the restrooms.

PART VII -- ANNUAL SERVICE

32. ADULT, JUVENILE, AND TOTAL CIRCULATION.

Report circulation of adult and juvenile materials separately, if possible. Juvenile materials are those purchased for use by pre-school through 6th grade children. If separate circulation records are not kept, please estimate. If estimates cannot be made, report total circulation for item 32c.

33. REFERENCE QUESTIONS HANDLED ANNUALLY (OR TYPICAL WEEK ESTIMATE TIMES 52). Report the number of contacts with library users which involve the knowledge, use, recommendation, interpretation, or instruction in the use of one or more information sources by library staff. Information sources may include any type of library materials, online database searches, union catalogs or lists, or other persons within or beyond the library (including communication without referrals to other libraries). Please count all reference questions asked by all users, regardless of age.

34-35. GROUP PROGRAMS/PRSENTATIONS AND ATTENDANCE (CHILDREN & ADULTS).

An information contact in which a staff member (or person invited by a staff member) provides information intended for a number of persons and planned in advance. Group programs or presentations may be either library instruction or cultural, recreational, or educational events. Events both on and off library premises are included, as long as they are sponsored by the library. Such service does not include meetings sponsored by other groups using library meeting space.

If possible, report separate numbers of programs/presentations and separate attendance figures for children and adults. If separate records are not kept, please estimate. If estimates cannot be made, report total programs/presentations for item 34c. and total attendance for item 35c.

36. INTERLIBRARY LOANS. Report materials provided to other libraries for item 36a. and materials received from other libraries for item 36b.

PART VIII -- STAFF SALARIES AND WAGES

37-41. DIRECTOR, ASSISTANT DIRECTOR, DEPARTMENT HEAD, SPECIALISTS, STARTING LIBRARIAN. For each of these five positions, use the "Low" and "High" columns to report the annual salary range. If the library has a salary schedule, use that range; use actual salaries only if the library does not have a salary schedule. If reporting an actual salary for a single employee (e.g., director), please enter the same salary figure in both the low and high columns. For each salary figure entered, be sure to indicate the number of hours paid per week. (NOTE: For full-time professionals not considered to be paid on an hourly basis, enter 40.) Also, be sure to circle YES or NO as to whether or not the position requires the Master of Library Science degree.

42-43. LIBRARY ASSISTANT & LIBRARY CLERK. For these two positions, report only the hourly wage range. As with annual salaries, report figures from a wage scale, if available, or actual wages, if there is no scale for the library. Also, as with salaries, enter the same figure in both the low and high columns, if reporting a single wage rate.

PART IX -- LIBRARY'S RELATIONSHIP TO LOCAL GOVERNMENT

44. WHO SUPERVISES THE LIBRARY DIRECTOR? Check the one response which best describes your library's relationship to local government. If none of the relationships described in items a.-e. reflect your library's situation, check f. and write your own description.

PART X - LIBRARY AUTOMATION AND TELECOMMUNICATIONS

45. AT LEAST ONE TELEPHONE. Simply circle YES or NO to the question, "Does your library have at least one telephone ...?"

46. MICROCOMPUTERS. Report the number of microcomputers available in your library in three categories: staff use only (e.g., a computer in an office or work area), public use (e.g., use for games, word processing, spreadsheets, databases), and staff and public use. Do not count CARL, IRVING, MARMOT, and other terminals dedicated to accessing online catalogs.

47. MODEMS. Simply circle YES or NO to the question, "Does your library own a modem?" (That's the "box" either inside or outside your microcomputer that allows it to communicate with other computers via telephone lines.)

48. COMPUTERIZED FUNCTIONS. Check all functions which your library handles either in whole or in part using its own computers.

STATISTICS &
INPUT-OUTPUT MEASURES FOR
SCHOOL LIBRARY MEDIA CENTERS
IN COLORADO, 1989

INTRODUCTION

This publication reports and analyzes 1988-89 data on 645 school library media centers (LMCs) in Colorado. These data on LMC resources (i.e., inputs) and services (i.e., outputs) were collected in the Colorado School Library Media Center Survey of 1989. In addition to reporting total books held and circulation per typical week, for example, this publication also reports books held per pupil and annual circulation per pupil. Such ratios will be helpful in comparing resources and services across LMCs.

The first section of this analysis examines trends among LMCs in Colorado in comparison with LMCs across the West and the U.S. Comparative figures for Western and U.S. LMCs used throughout this publication were obtained from "Expenditures for Resources in School Library Media Centers, FY '88-89", a June 1989 School Library Journal article by Marilyn L. Miller and Marilyn L. Shontz. Summary statistics and input-output measures for LMCs statewide follow.

The second section of this analysis examines trends among Colorado LMCs by school level with LMCs at different school levels regionally and nationally. Summary statistics and input-output measures for Colorado LMCs by school level follow.

The third section of this analysis examines trends among Colorado LMCs by school enrollment range with LMCs by enrollment range regionally and nationally. Summary statistics and input-output measures for Colorado LMCs by enrollment ranges follow.

Following this three-part analysis are "Top 10" rankings of Colorado LMCs on each per pupil output measure by school level. Rankings below the top 10 or for other statistics are available on request.

We deeply regret that the size of the Colorado School Library Media Center Database prohibits school-by-school reports in this publication. (We tried printing the whole database and found that it would have meant a two-inch thick publication, printed front and back!) In fact, however, we believe that we can serve you much better by making customized reports from this database available on request and at no charge. Following

INTRODUCTION--Continued

brief descriptions of the Library Research Service and the School Library Media Program, you will find a set of forms designed to help you develop a request for data that you can use to the benefit of your LMC and those it serves. We encourage you to use it.

STATISTICS &
INPUT-OUTPUT MEASURES FOR
SCHOOL LIBRARY MEDIA CENTERS
IN COLORADO, 1989

STATISTICAL NOTES

This publication reports statistics and input-output measures for Colorado's school library media centers statewide, by enrollment range, and by school level.

For each of these groups and each statistic or input-output measure, five figures are reported. These include:

HIGH	the highest figure reported on a statistic for a given group,
75%	the seventy-fifth percentile, or the third quartile, i.e., that figure below which three-fourths of figures reported on a statistic fall,
MEDIAN	the middle case, the fiftieth percentile, or the second quartile; i.e., that figure above and below which half of figures reported on a statistic fall,
25%	the twenty-fifth percentile, or the first quartile, i.e., that figure below which one-fourth of figures reported on a statistic fall, and
LOW	the lowest figure reported on a statistic for a given group.

Notably, average and total statistics are not reported. Medians are reported instead of averages, because the latter are too sensitive to extreme cases. Total statistics are not reported, because the 645 school library media centers (LMCs) which responded to the 1989 survey were a self-selected sample of only about half of LMCs statewide.

TRENDS IN COLORADO, THE WEST, AND THE U.S.

1989

COLLECTIONS, EXPENDITURES, AND MICROCOMPUTER USE IN LMC MANAGEMENT

TRENDS IN COLORADO, THE WEST, AND THE U.S., 1989

- Typical book collections in Colorado's school library media centers (LMCs) contain about 3,000 fewer books than those in LMCs across the West and nationwide.
- Typical audio-visual collections in Colorado LMCs contain more than 80 fewer A-V items than those in LMCs across the West.
- Typically, Colorado LMCs contain about the same number of books per pupil as their Western and U.S. counterparts.
- Typical Colorado LMCs spend over $3,500 less on materials than their Western counterparts and over $3,000 less than their counterparts nationwide.
- Typically, Colorado LMCs spend about the same amount per pupil on materials as their Western counterparts and $1.35 less than their counterparts nationwide.
- About a third fewer Colorado LMCs use microcomputers to handle circulation of LMC materials as LMCs nationwide.
- About a quarter fewer Colorado LMCs use microcomputers in cataloging LMC materials as LMCs nationwide.
- More than three times as many Colorado LMCs use microcomputers in processing interlibrary loan requests as LMCs nationwide.

COLORADO TRENDS BY SCHOOL LEVEL

1989

PREVAILING STAFFING PATTERNS

COLORADO TRENDS BY SCHOOL LEVEL, 1989

* Staffing of all types increases as school level increases.

* Media endorsed staff are reserved for junior high, middle, and high schools. Few are assigned to elementary schools.

* The absence of media endorsed staff in elementary schools is not made up in aides or volunteer staff.

* Typical staff hours per week for an elementary school are

--a third less than for junior high and middle schools, and
--half that for high schools.

MEDIAN STAFF HOURS PER WEEK BY TYPE BY SCHOOL LEVEL, 1989

COLLECTIONS AND THEIR USE
COLORADO TRENDS BY SCHOOL LEVEL, 1989

- While book volumes held increase with school level, book volumes per pupil is remarkably stable at
  - 16 for elementary, junior high, and middle schools, and
  - 14 for high school schools.

- Both book and audio-visual (A-V) circulation per pupil are dramatically higher for elementary schools.

- Elementary book circulation per pupil is
  - five times that of high schools, and
  - three times that of junior high and middle schools.

- Elementary A-V circulation per pupil is twice that of junior high, middle, and high schools.

LIBRARY/INFORMATION SKILLS CONTACTS

COLORADO TRENDS BY SCHOOL LEVEL, 1989

- LMCs in elementary schools provide over five times as many library/information skills contacts per pupil annually as LMCs in junior high, middle, and high schools.

- Notably, however, these contacts are not made by endorsed library media professionals.

MATERIALS EXPENDITURES

COLORADO TRENDS BY SCHOOL LEVEL, 1989

* School library media centers in Colorado high schools spend

-- more than three times as much on materials as LMCs in elementary schools, and

-- almost twice as much as LMCs in junior high and middle schools.

* But, the high school edge on materials expenditures per pupil is much less dramatic.

BOOK AND AUDIO-VISUAL COLLECTIONS

COLORADO & U.S. TRENDS BY SCHOOL LEVEL, 1989

- Typical book collections in Colorado school library media centers (LMCs) at every level contain fewer books than their counterparts nationwide. The gap ranges from 2,500 for elementary, junior high, and middle schools to 4,000 for combined and other schools.

- Typically, audio-visual (A-V) collections in Colorado LMCs at every level except junior high and middle schools contain fewer items than their counterparts nationwide. The gap ranges from over 100 for high schools to over 1,000 for combined and other schools.

MATERIALS EXPENDITURES

COLORADO & U.S. TRENDS BY SCHOOL LEVEL, 1989

- Typical school library media centers (LMCs) in Colorado, regardless of school level, spend less on LMC materials than their counterparts nationwide. The gap in materials expenditures ranges from $300 for high schools to $3,000 for combined and other schools.

- Typically, Colorado LMCs at every level except junior high and middle schools spend less per pupil on LMC materials than their counterparts nationwide. Junior high and middle schools at state and national levels tend to spend about $13.50 per pupil. The gap in materials expenditures per pupil ranges from about $2.00 for elementary and high schools to almost $15.00 for combined and other schools.

COLORADO TRENDS BY ENROLLMENT

1989

PREVAILING STAFFING PATTERNS

COLORADO TRENDS BY ENROLLMENT, 1989

- For schools with over 2,000 enrolled, the typical library media center (LMC) has
  - 2 endorsed library media specialists,
  - 2 library media aides, and
  - 1 volunteer.

- For schools with 500 to 1,999 enrolled, the typical LMC has
  - 1 endorsed library media specialist,
  - a half-time library media aide, and
  - a one-third time volunteer.

- For schools with less than 500 enrolled, the typical LMC has
  - a one-third time endorsed library media specialist and
  - a one-third to one-quarter time library media aide.

- LMCs serving larger enrollments have
  - more total staff hours, but
  - fewer staff hours per 100 pupils (suggests economy of scale).

COLLECTIONS & THEIR USE

COLORADO TRENDS BY ENROLLMENT, 1989

- As enrollment increases, book volumes per pupil decrease. This suggests an economy of scale.

- As book volumes and audio-visual items per pupil increase, book and A-V circulation per pupil increase. This finding indicates that high use of LMC materials depends on ready access to them.

- Book circulation per pupil jumps dramatically when enrollment falls below 700. Reasons for this are a mystery.

LIBRARY/INFORMATION SKILLS CONTACTS

COLORADO TRENDS BY ENROLLMENT, 1989

* As library/information skills contacts per week decrease, annual contacts per pupil increase. This finding indicates how labor-intensive such instruction is and how smaller enrollments permit more individualized instruction.

* Contacts per pupil increase for enrollments over 2,000 and decrease dramatically for enrollments less than 300.

* Library/information skills contacts per pupil increase as media endorsed staff hours per 100 pupils increase.

* Library/information skills instruction depends on availability of media endorsed professionals.

MATERIALS EXPENDITURES

COLORADO TRENDS BY ENROLLMENT, 1989

- **While materials expenditures decrease with enrollment, materials expenditures per pupil are remarkably stable across enrollment ranges.**

- **For school library media centers (LMCs) serving 300 to 2,000 enrollment, materials expenditures per pupil are about $8.60.**

- **Materials expenditures per pupil increase to about $10.00 for LMCs serving enrollments over 2,000. This finding probably indicates the cost of maintaining resource collections.**

- **Materials expenditures per pupil increase to about $15.00 for LMCs serving enrollments less than 300. This finding probably indicates a lack of economy of scale at this level of enrollment.**

BOOK AND AUDIO-VISUAL COLLECTIONS

COLORADO AND U.S. TRENDS BY ENROLLMENT, 1989

* Typical collections in LMCs across Colorado contain fewer books than their counterparts nationwide. The gap ranges from 1,000 books for enrollments over 2,000 to 2,000 books for enrollments of 300 to 499 and 700 to 999.

* Typical Colorado LMCs serving enrollments less than 2,000 have fewer books per pupil than their counterparts nationwide. The gap ranges from two books for enrollments of 1,000 to 1,999 to four books for enrollments of 300 to 499.

* Typical audio-visual collections in Colorado LMCs serving fewer than 1,000 pupils contain fewer A-V items than their counterparts nationwide.

ABOUT THE LIBRARY RESEARCH SERVICE

One of the purposes of the Library Research Service is to provide school library media specialists, coordinators of district library media programs, and other school decision-makers with facts and figures they need to develop better library media services for pupils and teachers in Colorado's public schools.

Data on library media resources and performance are collected and reported every three years and analyzed in periodic in-depth studies and regular updates on timely topics in the library media press.

The latter are published on a more or less monthly basis under the title, "FAST FACTS: Recent Statistics from the Library Research Service". FAST FACTS is distributed through the State Library's monthly mailing to district library media programs and on request to individual library media staff at the district or local level. If you want to see FAST FACTS and have not, just let us know--by mail, phone, or fax--that you want to be on that mailing list. Contact Keith Curry Lance, Director, or Louise Conner, Secretary, at:

Library Research Service
State Library & Adult Education Office
COLORADO DEPARTMENT OF EDUCATION
201 E. Colfax Ave., Room 309
Denver, CO 80203

Phone: (303) 866-6737 or 866-6906
Fax: (303) 830-0793

Customized research services as well as technical assistance in conducting surveys and using available data are available on request and at no charge.

ABOUT THE SCHOOL LIBRARY MEDIA PROGRAM

The purpose of the School Library Media Development Program is to effectively teach, train, and inspire library media staff to recognize the value of the services they provide to their schools and to society and to improve the effectiveness of that service. To this end, the program conducts research, produces publications, presents workshops, and provides technical assistance.

These publications include Colorado Information Power: Guidelines for School Library Media Programs, Statistics and Input-Output Measures for School Library Media Centers in Colorado, and the Colorado Summer Reading Program Manual.

Presentations address a variety of topics, including "Information Literacy", "Information Power", "Library Partnerships: School/Public/Academic" and "Reaching the Nonreader". The first of these workshops explores the concept of information literacy as a skill for lifelong learning--a way of finding, using, and evaluating information thorugh a problem-solving process. The second familiarizes school library media specialists with the Colorado school library media guidelines. The third assists school, public, and academic libraries in maximizing their resources and their impact by forming partnerships. And, the fourth teaches participants strategies and resources for motivating children who are beginning readers or nonreaders to use and enjoy the library.

To obtain publications, information on when and where workshops will be offered, or technical assistance (e.g., applying the School Finance Act, using any of the publications, addressing any of the workshop issues) contact Lynda Welborn, Senior Consultant, School Library Media, at:

CUSTOM RESEARCH REQUEST FORM

To make it as easy as possible for you to request customized reports based on these data, a Custom Research Request Form is enclosed. Attached to that form is a two-page list of the data elements available for the 645 school library media centers (LMCs) in Colorado whose directors responded to the 1989 survey and comparable data available at regional and national levels.

You may request presentation-quality tables and/or graphics which illustrate how your LMC compares with other LMCs nationwide, regionally, statewide, or by enrollment, school level, or expenditures. If you wish you can even use the back of the request form to list by name up to ten schools or five districts with which you would like to have your LMC compared.

Also, if you can supply data on your library media budget for any period between 1980 and 1989, you may receive a chart illustrating how rising costs and inflation have affected your budget's purchasing power. A separate form--accompanied by an example--is provided for that request.

These data were collected to help promote the development of library media services in Colorado schools. We encourage you to take advantage of this opportunity to gain directly from your participation in the 1989 survey. These data can be used to develop plans for your LMC, to justify its budget--perhaps even a budget increase!--and to increase awareness of its resources and services among pupils, teachers, administrators, and parents. If you have any questions regarding these custom research services, please feel free to contact Keith Curry Lance, Director, Library Research Service, at:

1. Which statistics do you need? Do you need them for Colorado only? For the West? For the U.S.? Circle the "x"s on the attached list of data elements which correspond to the statistics you want and the geographical areas for which you want them.

2. Within Colorado, on what basis do you want "comparable" LMCs selected? Check as many as apply.

   a. enrollment ☐
   b. school level ☐
   c. materials expenditures ☐
   d. materials & equipment expenditures ☐
   e. other--please specify from attached list of data elements ☐

3. Within the U.S., on what basis do you want "comparable" LMCs selected?

   a. enrollment ☐
   b. school level ☐

4. In what format do you wish to receive these statistics? Check as many as apply.

   a. tables ☐
   b. graphics (e.g., pies, bars) ☐
   c. graphics with text charts interpreting them ☐

5. What is the latest date at which these materials will be useful to you? _____

ORDER FORM FOR CHART ILLUSTRATING IMPACT OF RISING COSTS & INFLATION ON LIBRARY MEDIA EXPENDITURES

Contact Person ______________________________
School Name & Level ______________________________
District Name (County-City/Other Name-Number) ______________________________
Mailing Address ______________________________
City ______________________________ Zip Code __________

Telephone Number (_____)____________ Fax Number (_____)____________

Attached is an example of a chart illustrating the impact of rising costs and inflation on library media expenditures. This chart was developed using the library media sub-index of the School Price Index. If you would like to have such a chart for your school or district budget and either do not have the School Price Index or do not know how to use it for this purpose, provide as many of the following figures as you can.

Complete both of the following blanks if the data which follows is for your particular school. Complete only the second blank if the data which follows is for your entire district.

The following data is for:

School Name & Level ______________________________

OR

School District Name (County-City/Other Name-Number) ______________________
